

**Ecology Report for Application No: (tbc)**

**Grid Ref: SW 75198 24669**

**Tregithew Farm, Manaccan, TR12 6HX**

**Author:** Charlotte Elliott, retired from Natural England after ten years of employment. Tenure of a variety of roles during that time furnished the author with a good general knowledge of wildlife ecology, habitat management and development impact.

The proposal is to install a modern sewage treatment plant and associated pipework beneath the farm yard to the west of Tregithew farmhouse.

Due to the nature of the works, it is considered most unlikely that there will be any impact on any protected species.
