What is the proposal:
Ground Floor

- The proposed ground floor design involves a strategic relocation of the kitchen to the rear extension, transforming the existing kitchen into a multifunctional space serving as a Living Room and study.
- The layout optimally combines the Kitchen, Dining, Wetroom, Utility, and Snug areas to facilitate efficient circulation.
- Architectural enhancements include the addition of a glass door and triangular glazing on the rear facade, providing residents with captivating views of the scenic rear garden.
- Roof Lights have been integrated to ensure ample and efficient natural lighting for various daily chores.
