

Major proposals within 250m of a pond or minor proposals within 25m of a pond with GCN				▪								Not applicable
Proposals affecting semi-natural grasslands or heathlands			•						•			Not applicable
Proposals affecting brownfield sites, allotments and railway land			▪	▪				▪	▪	▪		Not applicable
Proposed development affecting any feature known to support <u>protected species</u> *	▪	▪	▪	▪	▪	▪	▪	▪	▪	▪	▪	Not applicable

Major developments sites over 4 hectares in area												Not applicable
---	--	--	--	--	--	--	--	--	--	--	--	----------------

*Confirmed by data searches or other information made available to the Applicant or Local Planning Authority

TABLE 2
Sites recognised for their biodiversity importance

Sites	Status*							Does the development affect biodiversity?
	international (RAMSAR, SPA SAC)	National (SSI)	Local Nature Reserve	Wildlife Site	Other Nature Reserve	Hedge row Res	Other Priority Habitat	
Proposals on or adjacent to a Statutory designated site	▪	▪	▪		•	▪	▪	Not applicable
Proposals on or adjacent to a non-statutory designated site				▪	▪	▪	▪	Not applicable

* a full list of Priority Habitats (Habitats of Principal Importance for Biodiversity under S.41 of the NERC Act 2006) is given in the ALGE document checklist.

TABLE 3
Local requirement for geodiversity sites and features: Criteria and indicative thresholds (trigger list) for when a survey and assessment is required

Proposals for development that may trigger a Geodiversity Survey and Assessment	Key sites which an impact assessment may be required						Does the development affect geodiversity?
	Quarries and pits	Inland outcrops	Road / rail / canal cuttings	Underground mines	Fossil sites	Geo-morphological features	
Impact on internationally designated site	▪	▪	▪	▪	▪	▪	Not applicable
Impact on nationally designated site	▪	▪	▪	▪	▪	▪	Not applicable
Impact on Regionally and locally designated sites	▪	▪	▪	▪	▪	▪	Not applicable

The above Tables are a guide as to what biodiversity or geodiversity is important and the types of development that may affect it. Surveys and recommendations are only required if biodiversity is likely to be present and affected by proposals.

Surveys and assessments are unlikely to be required by the Local Planning Authority (LPA) where:

1. Following consultation by the applicant at the pre-application stage, the LPA or its advisors are of the opinion that surveys or assessments are not required.

2. It is clear from the nature of the site that locally significant ecological or geological interest is likely to be absent, or that the proposal is unlikely to have a significant impact.

In any event and irrespective of any advice or requirements of the LPA, protected species remain legally protected and if discovered during the course of any works, these must cease and expert guidance sought as to how to proceed.

Opportunities for enhancing biodiversity are to be encouraged in any ecological report irrespective of outcome.

CONCLUSIONS

Has HE or HMWT been contacted for advice on this matter?

N

Is biodiversity / geodiversity interest known to be present and likely to be affected by the proposals?

N

If Y, has a survey and recommendations been submitted with this application?

N/a

Site Address: 150A TOMS LN, KINGS LANGLEY WD4 8NZ

Details of person responsible for completing the checklist:

Name: Gisele Viselka (AC DESIGN SOLUTIONS)

Relationship to proposal: Agent

e.g. applicant, agent, ecological consultant

Declaration:

Being familiar with the proposed development and the site in question, the information supplied is correct to the best of my knowledge.

Signed: MOHAMED EMARA

Date: 05-02-2024
