Rutland
LE15 9NN

28 February 2024

Dear Planning Officer,

Having previously been granted permission (2023/0846/FUL) to replace the windows in The Old Barn Cottage to an aluminium type, which would be in keeping with the village and age of property, we have subsequently been advised by the window fitter (Westmoreland Windows, Oakham) that the frames would be too thin to support the roof of the bay windows. They have suggested a new aluminium window, which, although thicker framed than the in the original application, are still in keeping with the current wooden windows (and possibly even more similar in profile).

The sizes and colours of the windows would remain the same as in the original planning application.

Please do contact me should you need any further information

Kind Regards
