Description of Proposed Works

Please describe the proposed works

The work is required to provide an additional bedroom to an end of terrace two bedroom property along with downstairs toilet facilities. This will be done by increasing the roof height of the existing building and changing the internal downstairs layout. The roof requires repair and maintenance work already and the small uplift of roof height required will just increase the usable height and roof space of an existing loft area. The work is required as the property is currently occupied by a growing family of five. The current roof is in poor condition with fibrous cement slates. These will be replaced with proper slates to match the existing main roof.

Biodiversity net gain

Householder developments are currently exempt from biodiversity net gain requirements.

However, this exemption still needs to be confirmed by the applicant or agent when making a householder planning permission application.

I/we confirm that the proposed development, if granted permission, would be exempt from the general biodiversity gain condition.

Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended) sets out that every planning permission granted for the development of land in England shall be deemed to have been granted subject to the 'general biodiversity gain condition'.

However, the 'general biodiversity gain condition' does not apply in relation to planning permission for a development which is the subject of a householder application, within the meaning of Article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended).

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
