

## **Sustainability Statement - minor applications**

| Sustainability standards   | Yes                                     | No                                      |
|--|---|---|
| A Net zero carbon  | 4.0000000000000000000000000000000000000 | *************************************** |
| I. Has the building fabric been designed to standards of ultra-low energy demand?                                    | X                                       |   |
| Has thermal comfort and the risk of overheating been assessed and passive  | 1                                       |   |
| design measures been prioritised?  | ×                                       |   |
| 3. Is the development fossil fuel free?  |   |   |
| •  | ×                                       |   |
| 4. Will a net zero operational carbon balance be achieved and 100% of energy consumption delivered using renewables? |   | ×                                       |
| 5. Will embodied carbon emissions be minimised?  | ×                                       | <del> </del>                            |
| B Travel   |   |   |
| Is home working supported?   | ×                                       |   |
| 2. Has active travel been prioritised?   |   |   |
| 2. Has active travel been prioritised?  L)A.   |   | ×                                       |
| 3. Is shared mobility facilitated?   | ×                                       |   |
|  |   |   |
| 4. Will electric vehicle charging infrastructure be provided?  |   | X                                       |
| C Water  |   |   |

| Ι.                                   | Will water consumption be minimised?  |   |   |     |  |
|--------------------------------------|---|---|---|-----|--|
|                                      |   |   | İ |     |  |
| 2.                                   | Will water be conserved through rainwater harvesting or grey water recycling?                                   | × |   |     |  |
| 3,                                   | Has the flood risk assessment accounted for climate change and is sustainable drainage proposed?                |   |   |     |  |
|                                      | gramago propossar   |   |   |     |  |
| D                                    | Waste   |   |   |     |  |
| ſ.                                   | Will the construction company be registered with the Considerate Construction Scheme?                           |   |   | 니), |  |
| 2.                                   | Will a Site Waste Management Plan be followed and targets set for construction waste recycling and disposal?    | × |   |     |  |
|                                      | waste recycling and disposal:   |   |   |     |  |
| 3.                                   | Will there be safe and convenient access to waste recycling?  |   |   |     |  |
|                                      |   |   |   |     |  |
| E Voluntary sustainability standards |   |   |   |     |  |
| Ι.                                   | Will non-domestic development be BREEAM certified?  |   | X |     |  |
|                                      |   |   |   |     |  |
| 2.                                   | Will the development receive a sustainability accreditation and/or follow recognised sustainability principles? |   | × |     |  |
|                                      |   |   |   |     |  |
| F                                    | Only for development affecting heritage assets or traditional buildings   |   |   |     |  |
| Ι.                                   | Have the heritage value of the building(s) and impact on any heritage asset been appropriately assessed?        |   |   |     |  |
|                                      |   |   |   |     |  |
| 2.                                   | Is a whole building approach being taken?   |   |   |     |  |
|                                      |   |   |   |     |  |
| 3.                                   | Will responsible retrofit measures be adhered to?   |   |   |     |  |
|                                      |   |   |   | 7   |  |
