Cedar in Rear Garden

This tree is approximately 9 metres tall, with a 4.5 metre canopy spread and a trunk diameter of 450mm. This tree is in good condition with no visual defects. However, this tree is becoming overpowering for its location.

Recommendation

Considering cedars generally don't respond well to being heavily reduced, we would suggest this tree is removed in its entirety to allow for garden regeneration and for several fruit trees to be planted in the area this tree currently occupies.
