Description of Proposed Works

Please describe the proposed works

The existing timber and glass conservatory at the rear of the property is in poor repair. The roof timbers are rotting and the roof leaks, this in turn is causing water ingress into the rear wall brick work of the listed building. The conservatory has a brick wall on the north side, bordering the courtyard to the rear of the property, and also a knee high parameter brick wall upon which the timber and glass frame is constructed. The plan is for the replacement conservatory to retain the existing north flank brick wall and maintain the same footprint of the existing conservatory. The works will require the replacement of the wood frame / glass walls on the southern and western flanks of the conservatory and the existing glass lantern roof would be replaced with a solid wooden construction roof to improve the thermal efficiency of the conservatory construction. Stylistically the new conservatory will be a changed from the heavy timber frames of the existing conservatory, to a more transparent floor to ceiling glass panels that will allow the listed building itself to be more visible from the garden.

Householder developments are currently exempt from biodiversity net gain requirements.

I/we confirm that the proposed development, if granted permission, would be exempt from the general biodiversity gain condition.

Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended) sets out that every planning permission granted for the development of land in England shall be deemed to have been granted subject to the 'general biodiversity gain condition'.
