## 1 INTRODUCTION

- 1.1 Bellamy Roberts has been appointed by Darlington's Residential Ltd to prepare a Transport Statement (TS) to support a planning application for residential development on land at Oaktrees, Clandon road, Send. A site location plan is provided at Figure 1, shown below.

Figure 1: Site Location Plan

### Scope of Statement

- 1.2 The Transport Statement considers the transport and highway issues resulting from the proposed development. In particular, it will assess the safety of the proposed access arrangement and quantify the likely traffic generated by the scheme. The report will also identify how the scheme will deliver sustainable travel opportunities parking and capacity in line with National and local transport policies.

### The Structure of Report

The structure of the Transport Statement is as follows:-

- Section 2:** Describes the existing transport conditions within the vicinity of the site including opportunities to travel via walking, cycling and public transport, and provide an overview of the characteristics of the highway network.
- Section 3:** Describes the development proposals including the proposed site access parking provision (car and cycle) and service arrangement.

**Section 4:** Considers sustainable transport connections to the local facilities and services.

**Section 5:** Considers the traffic generation (vehicles) of the scheme and provide an assessment of the cumulative impact on the local highway network.

**Section 6:** Provides the summary of the Statement and concludes that:

- The site offers realistic opportunities for the residents and visitors to the proposal to use suitable modes of transport and would provide development in a sustainable location.
- The access to the site would provide safe and suitable access for all users.
- The traffic generated by the development could be safely accommodated on the local highway network without creating a severe impact.

**1.3** In preparing the Statement, accident data has been obtained from Crashmap and speed surveys undertaken previously.

**1.4** The proposal will be considered against the key principles set out in the NPPF, and will be found to be acceptable in highway capacity, safety and transport terms.

## 2.0 EXISTING SITE AND SURROUNDING AREA

2.1 This section of the Transport Statement sets out the existing transport conditions within the area. This includes a review of the opportunities to use non car modes as well as the current operation of the existing highway network.

### Location

2.2 The site is located at the western side of Clandon Road, close to the roundabout junction of the B2215. A site location plan is provided at [Appendix 1](#).

### Walking

2.3 The site is accessed via Clandon Road (A247). Within the vicinity of the site access, the A247 has a footway on the eastern side.

2.4 There are a number of Public Rights of Way (PRoW) in the vicinity of the site. A plan illustrating the footpaths and bridleways is attached at [Appendix 2](#).

2.5 The centre of the site is located within a 2km radius of West Clandon and Send making it easily accessible to residents of the development. Pedestrian and cycle isochrone plans have been produced and are attached at [Appendix 3](#). The plans show which facilities are in both walking and cycling distance of the site. It can be seen that access can be gained to the local shopping facilities, various parks, churches, schools and nurseries.

### Cycling

2.6 There are no designated cycle facilities along the A247 passed the site. However, there are cycleways along the B2215, 120m or so from the site. It is considered the local highway network is of a suitable and safe standard to encourage cycle use.

2.7 The proposed development will provide secure cycle parking in line with the LPA requirements.

### Buses

- 2.8** The nearest bus stops to the site are located on the A247 approximately 75m from the proposed site access, the nearby stop has a bus shelter.
- 2.9** There are, frequent, regular and convenient services that pass the site and nearby within 400m.

### Local Highway Network

- 2.10** The site will be accessed from the A247 which is a two-way single carriageway road linking Send in the north with the A3 and South Clandon to the south. The A247 in the vicinity of the site is subject to a 40 mph speed limit.
- 2.11** There is pedestrian footway and cycle provision, and streetlights along the A247 and B2215.

### Highway Safety Records

- 2.12** Personal Injury Accident data (PIA) from the most recent five year period has been obtained from CrashMap. The report, study area and accident information is set out in [Appendix 4](#) and is summarised below:
- 2.13** The analyses of the data reveals that there have been 3 accidents recorded within the search area within the past five year period. The accidents resulted in three 'slight' injuries. Two of the accidents occurred on the roundabout. The third accident occurred on the approach to the roundabout where a vehicle attempted to undertake a 'U' turn.
- 2.14** The accident data obtained from CrashMap for the most recent five year period does not highlight any material safety concerns on the local highway network.

### Summary

- 2.15** The site is well located to the existing highway and pedestrian network within the area. There are existing footways and cycleways provided near to the site and serving the area.
- 2.16** There are good frequent bus services passing the site with bus stops only 75m from the site.

- 2.17** A detailed review of the available accident data has been undertaken and does not identify any specific road safety problems with the local highway network that the proposal would add significantly to.

## 3.0 PROPOSED DEVELOPMENT

3.1 It is proposed to provide 4 dwellings on the land to the west of Clandon Road. This will replace an existing large, detached dwelling.

### Site Layout

3.2 The proposed site layout has been designed by d-10 Architects and combines two pairs of 3 bed semi-detached dwellings, each providing two car parking spaces and each semi-detached having a shared access which utilises the existing accesses.

### Site Access

3.3 Vehicular and pedestrian access for the site is proposed from Clandon Road, as illustrated on the access plans 5925/001Rev.A at [Appendix 5](#).

3.4 Both accesses are taken from Clandon Road where the current accesses are located and conform to current standards, with visibility achieved is commensurate with the recorded traffic speeds. The accesses will function as an 'In' and an 'Out' with the 'In' being the most southerly.

3.5 The site lies just within a 40mph speed limit close to the roundabout junction of the B2215 with A247. As traffic speeds would vary either side of the application site, speed surveys were undertaken within the vicinity of the site by Basepoint. The survey (ATC) was conducted between 7<sup>th</sup> September and 13<sup>th</sup> September 2023. The full results of the survey are attached at [Appendix 6](#)

3.6 The results of the speed survey established that the 85<sup>th</sup>ile speeds are:-

- Southbound (away from the roundabout) 38.8mph
- Northbound (towards the roundabout) 40.4mph

3.7 The corresponding visibility splays have been illustrated on the access plan attached at [Appendix 5](#) and are commensurate with the speed of traffic and conform to advice within Manual for Streets (MfS).

### **Internal Road Layout**

- 3.8** The internal site road layout conforms to the advice within Manual for Streets (MfS). Swept path analysis has been carried out to ensure cars can manoeuvre within the site conveniently and safely.
- 3.9** It is anticipated that refuse collection would remain as for the existing dwellings.
- 3.10** TRACK analyses have been undertaken and attached at [Appendix 7](#).
- 3.11** The scheme provides a convenient route linking the site with the bus stops, and nearby footway network.

### **Parking Provision**

- 3.12** Car parking is provided in accordance with the Guildford Council's SPD car parking standards March 2023.
- 3.13** The proposal provides for some 8 car parking spaces.
- 3.14** Cycle parking provision will be accommodated within garages in accordance with the Council's standard.

### **Summary**

- 3.15** The development will be accessed off Clandon Road. The access has been designed in accordance with MfS and is commensurate to the traffic speeds along the A247.
- 3.16** The internal site layout has been designed in accordance with Manual for Streets.
- 3.17** Car and cycle provision will be provided in accordance with current standards as required by the Local Authority.

## 4.0 ACCESSIBILITY

4.1 This section of the report considers accessibility, and in particular the sustainable transport connections.

### Walking

4.2 It is recognised that walking is the most important mode at the local level and offers the greatest potential to replace short car trips, particularly those under 2km. The site is within easy walks of Send and West Clandon, giving residents and visitors the realistic option of using this alternative mode of transport.

4.3 The majority of trips (80%) are undertaken on foot for journeys under one mile (1.6km). The data below also shows that 15% of journeys between 1 and 5 miles (1.6 to 8km) will be on foot.

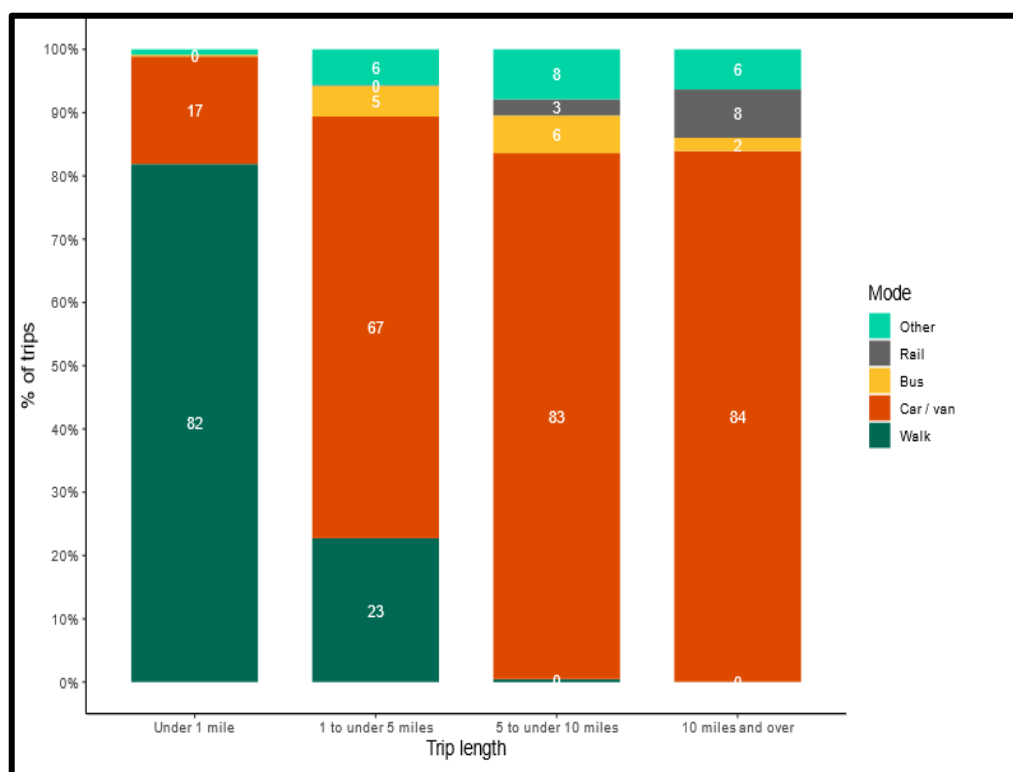

Figure 2: Mode Share of Trips  
Source: National Travel Survey, England 2021

**4.4** The 1.6km distance (1 mile) is referenced in the published Chartered Institute of Highways and Transportation (CIHT) guidance “Planning for Walking” 2015, which states:

*“Across Britain, approximately 80% of journeys shorter than 1 mile are made wholly on foot – something that has changed little in 30 years. The main reason for the decline in walking is the fall in the total number of journeys shorter than 1 mile, which has halved in thirty years. It is not that people are less likely to make short journeys on foot but rather that fewer of the journeys they make can be accomplished on foot. If destinations are within walking distance, people are more likely to walk if walking is safe and comfortable and the environment is attractive”.*

**4.5** As such, providing new homes on the application site would provide a realistic opportunity for trips to be made on foot.

**4.6** The distance of one mile (1.6km) is not the maximum that people are prepared to walk, not that development must be located within one mile of everything. It is evidence from the National Travel Survey (NTS) data that approximately 15% of journeys between 1 to 5 miles (1.6km to 8km) are undertaken on foot.

**4.7** The main pedestrian access to the site will be from Clandon Road.

**4.8** A footpath runs on the eastern edge of Clandon Road on the A247 and beyond. A plan illustrating the footpaths and bridleways is attached at Appendix 2.

### **Cycling**

**4.9** There is a designated cycle facility in the vicinity of the site along the B2215. It is considered the local highway network is of a suitable and safe standard to encourage cycle use.

**4.10** The proposed development will provide secure cycle parking in line with the LPA requirements.

## Buses

**4.11** The nearest bus stop to the site is located on the A247 and B2215 approximately 75m from the site.

**4.12** Table 1 below, summarises the bus services available at this location along with their designation and frequency.

**Table 1: Summary of Bus Services**

No	From	To	Mon-Fri			Sat			Sun		
			First	Last	Freq	First	Last	Freq	First	Last	Freq
462	Guildford	Woking	07:27	18:25	2Hrs	07:40	18:25	2Hrs	No Service		
462	Woking	Guildford	06:38	17:25	2Hrs	09:50	17:25	2Hrs	No Service		
463	Guildford	Woking	09:50	17:25	2Hrs	09:50	15:20	2Hrs	No Service		
463	Woking	Guildford	07:20	18:20	2Hrs	08:50	18:20	2Hrs	No Service		
715	Guildford	Kingston Upon Thames	05:25	19:00	1Hr	05:25	19:00	1Hr	08:20	17:30	1:30
715	Kingston Upon Thames	Guildford	06:38	19:25	1Hr	06:50	19:25	1Hr	09:03	18:45	1:30

## Summary

**4.13** The site is accessible to a wide range of facilities that residents and visitors may use on a daily basis, by a range of travel modes, including by cycle and on foot.

**4.14** The local bus services pass the site and bus stops are nearby, providing convenient access to local destinations and further afield, including Guildford and Woking.

## 5.0 TRAFFIC GENERATION AND IMPACT

5.1 This section establishes the traffic generated by the proposal, and assesses the vehicular traffic impact on the local network.

### Proposed Development Traffic Generation

5.2 The TRICS database (V7.10.1) has been interrogated to calculate the likely traffic generation of the proposed development, and committed sites.

5.3 The trip rates were obtained using the following parameters:

- Region England only (excluding Greater London, Greater Manchester, Merseyside, Isle of Man, Cornwall, Isle of Wight, Bristol City)
- Sub-land use Houses privately owned
- Location Suburban and neighbourhood centre only
- Period Weekdays only
- Size Up to 50 dwellings
- Dates Surveys between 01/01/15 to 9/11/22 included

5.4 The trip rates along with the traffic generation are shown in Table 2 below and the full computer printout is attached at [Appendix 8](#).

**Table 2: Proposed Development Traffic Generation (4 units)**

Time Period	Trip Rates			Traffic Generation		
	Arrival	Departure	2-way	Arrival	Departure	2-way
AM Peak 0800-0900	0.146	0.318	0.464	0.58	1.27	2
PM Peak 1700-1800	0.257	0.158	0.415	1.03	0.63	2

5.5 The proposed development is predicted to result in 2 vehicle movements (two way) in the morning and evening peak periods.

### **Traffic Impact**

- 5.6** Such movements would have a negligible impact on the immediate highway network particularly when compared with the current traffic movements generated by the large, detached dwelling.

## 6.0 SUMMARY AND CONCLUSION

### Summary

- 6.1 The proposed 4 units would likely generate 2 vehicular movements during the peak hour periods.
- 6.2 The proposal would not result in a safety or capacity concern on the local highway.
- 6.3 The proposals would conform to standards as set out within the Council's Local Guidance and Manual for Streets.
- 6.4 This Transport Statement has been prepared to assess the proposals in light of key transport criteria within NPPF.
- 6.5 The site is within an accessible location with a range of modes for all users.
- 6.6 The access serving the site would conform with MfS. Auto TRACK analyses have been undertaken to demonstrate that vehicles can manoeuvre within the site and the access safely.
- 6.7 The impact of the traffic generated on the immediate highway network has been assessed and the scheme would have negligible impact on the surrounding roads.
- 6.8 Having undertaken a robust analysis of the site access, traffic generation and roads, it has been demonstrated that the development would not result in an unacceptable impact on highway safety or capacity, and the impact on the roads would not be severe.

### **Conclusion**

#### **6.9**

It has been demonstrated that:

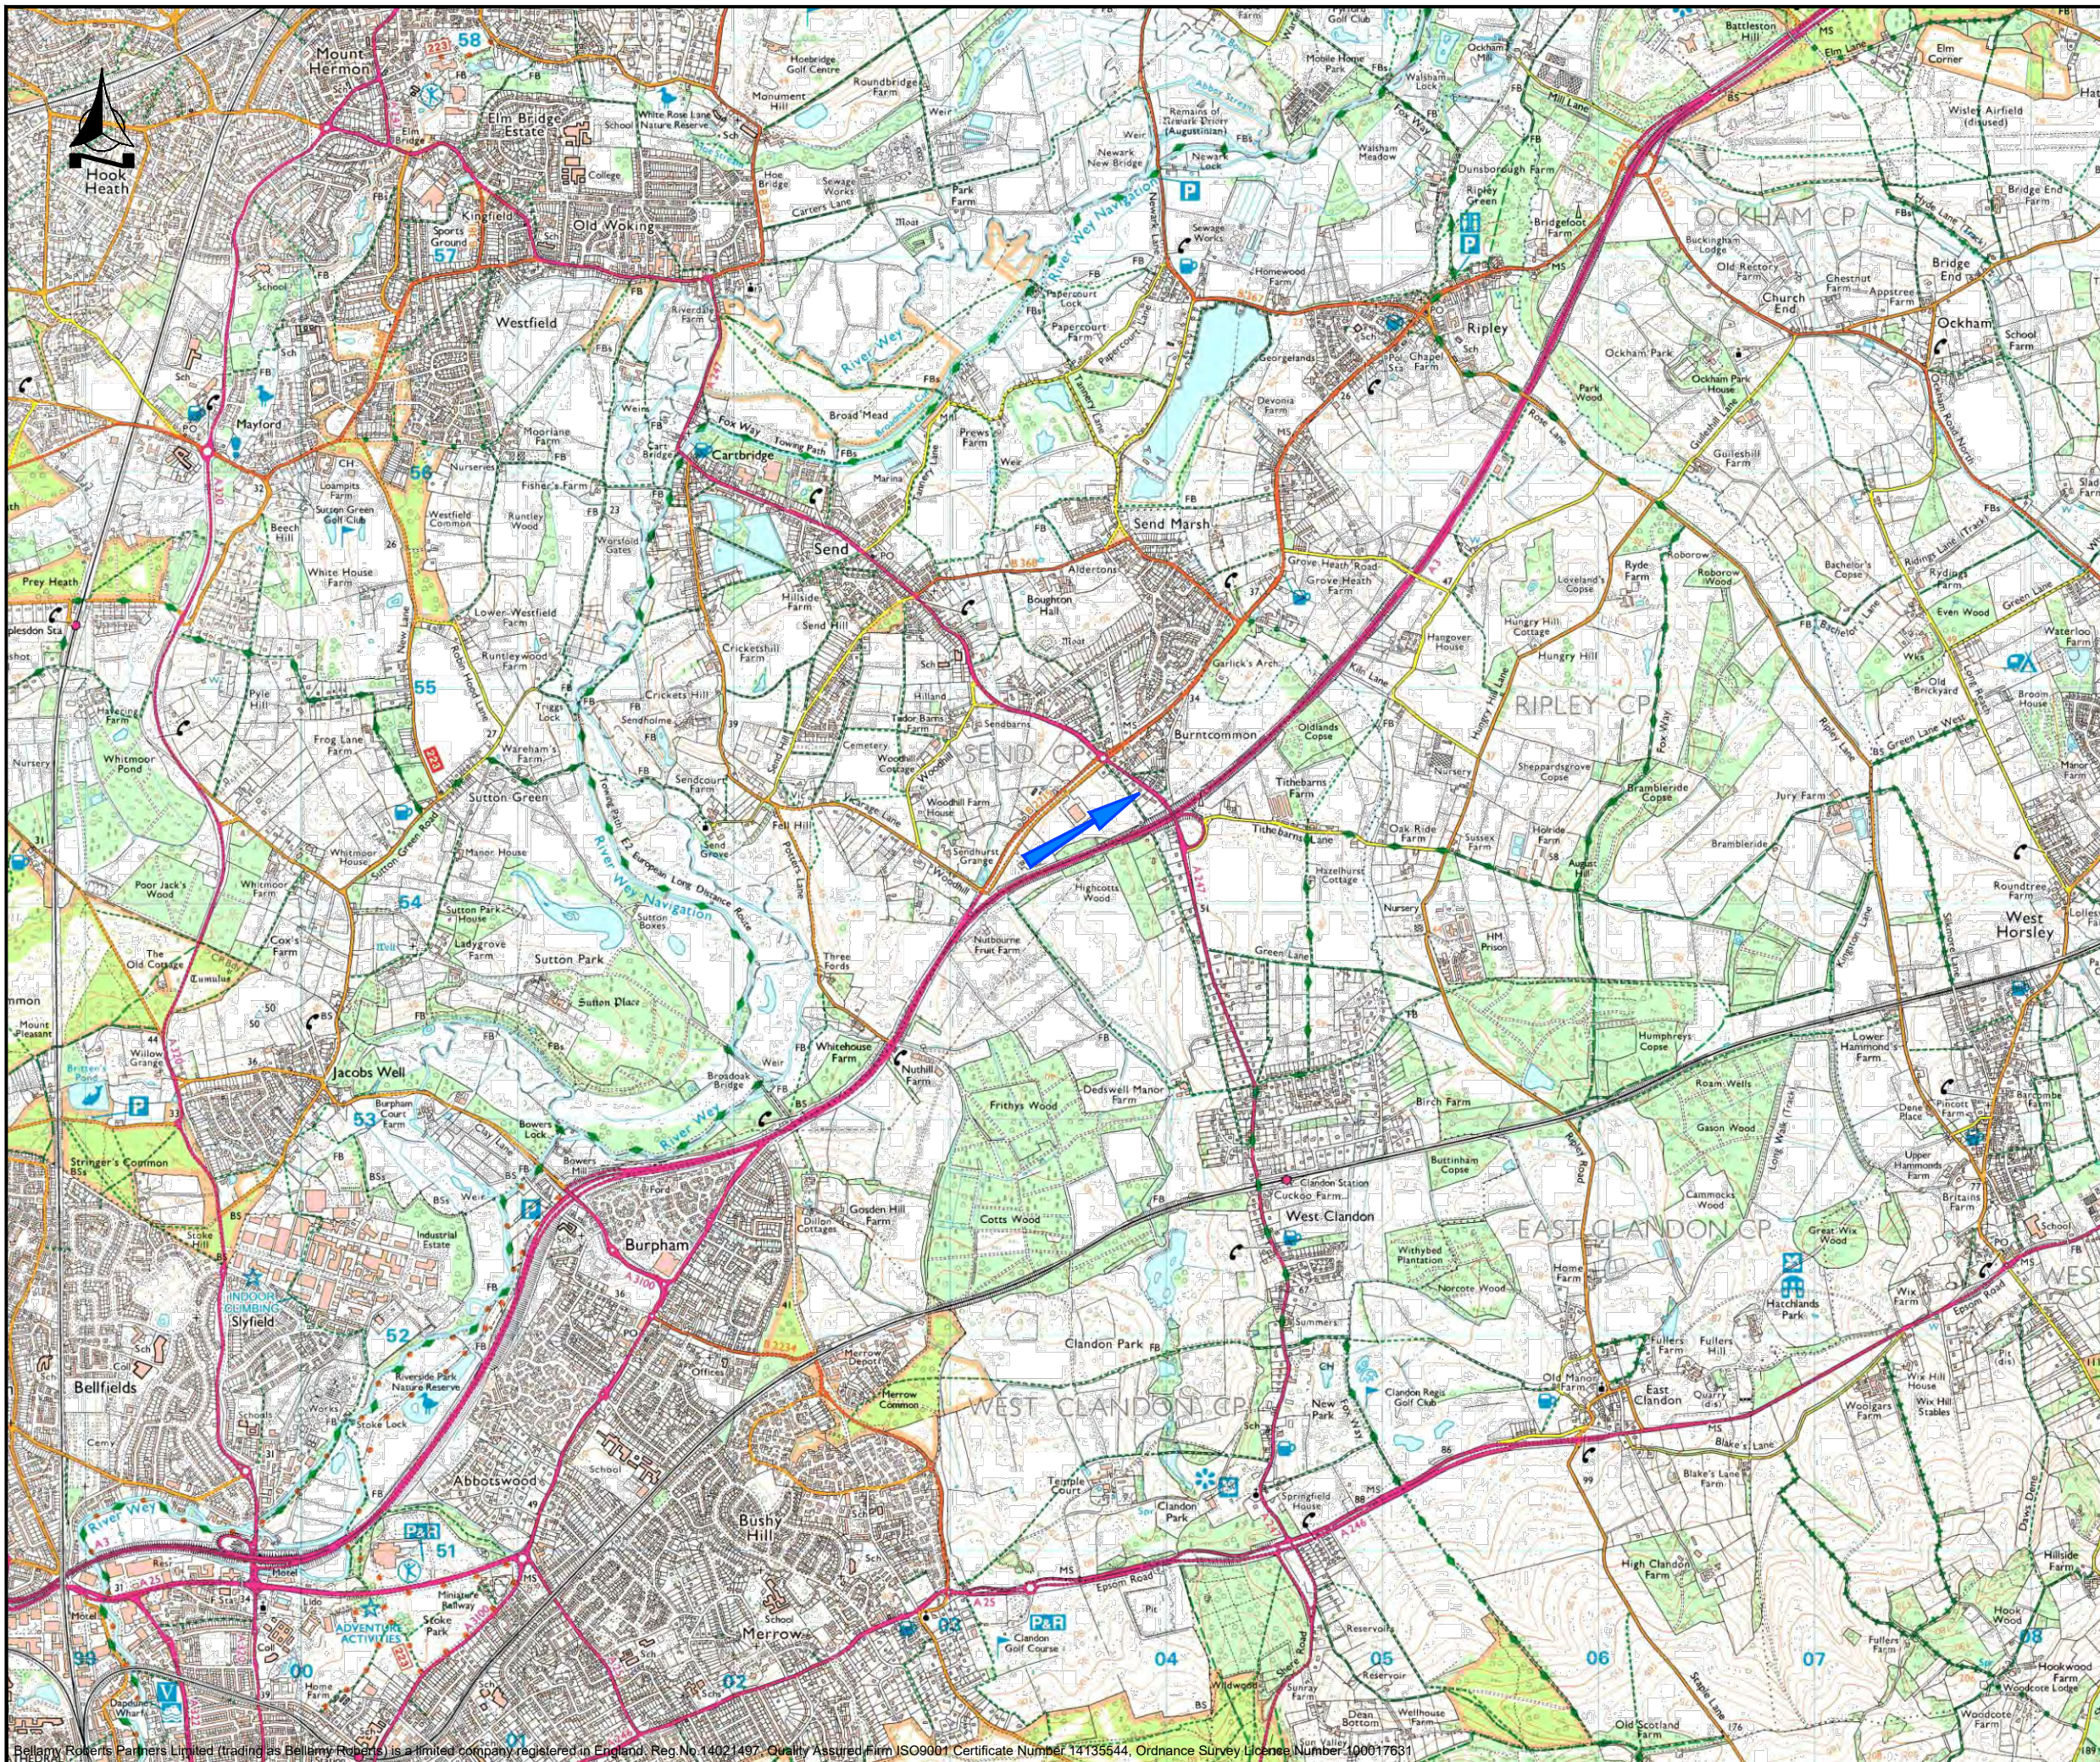

- There are genuine opportunities for residents to travel to/from the development site using sustainable modes.
- The proposed site access and internal road layout would be safe and able to serve all users.
- The Local Highway network can accommodate the traffic generated by the scheme during peak periods resulting in negligible impact on the network.

# Classification Schemes

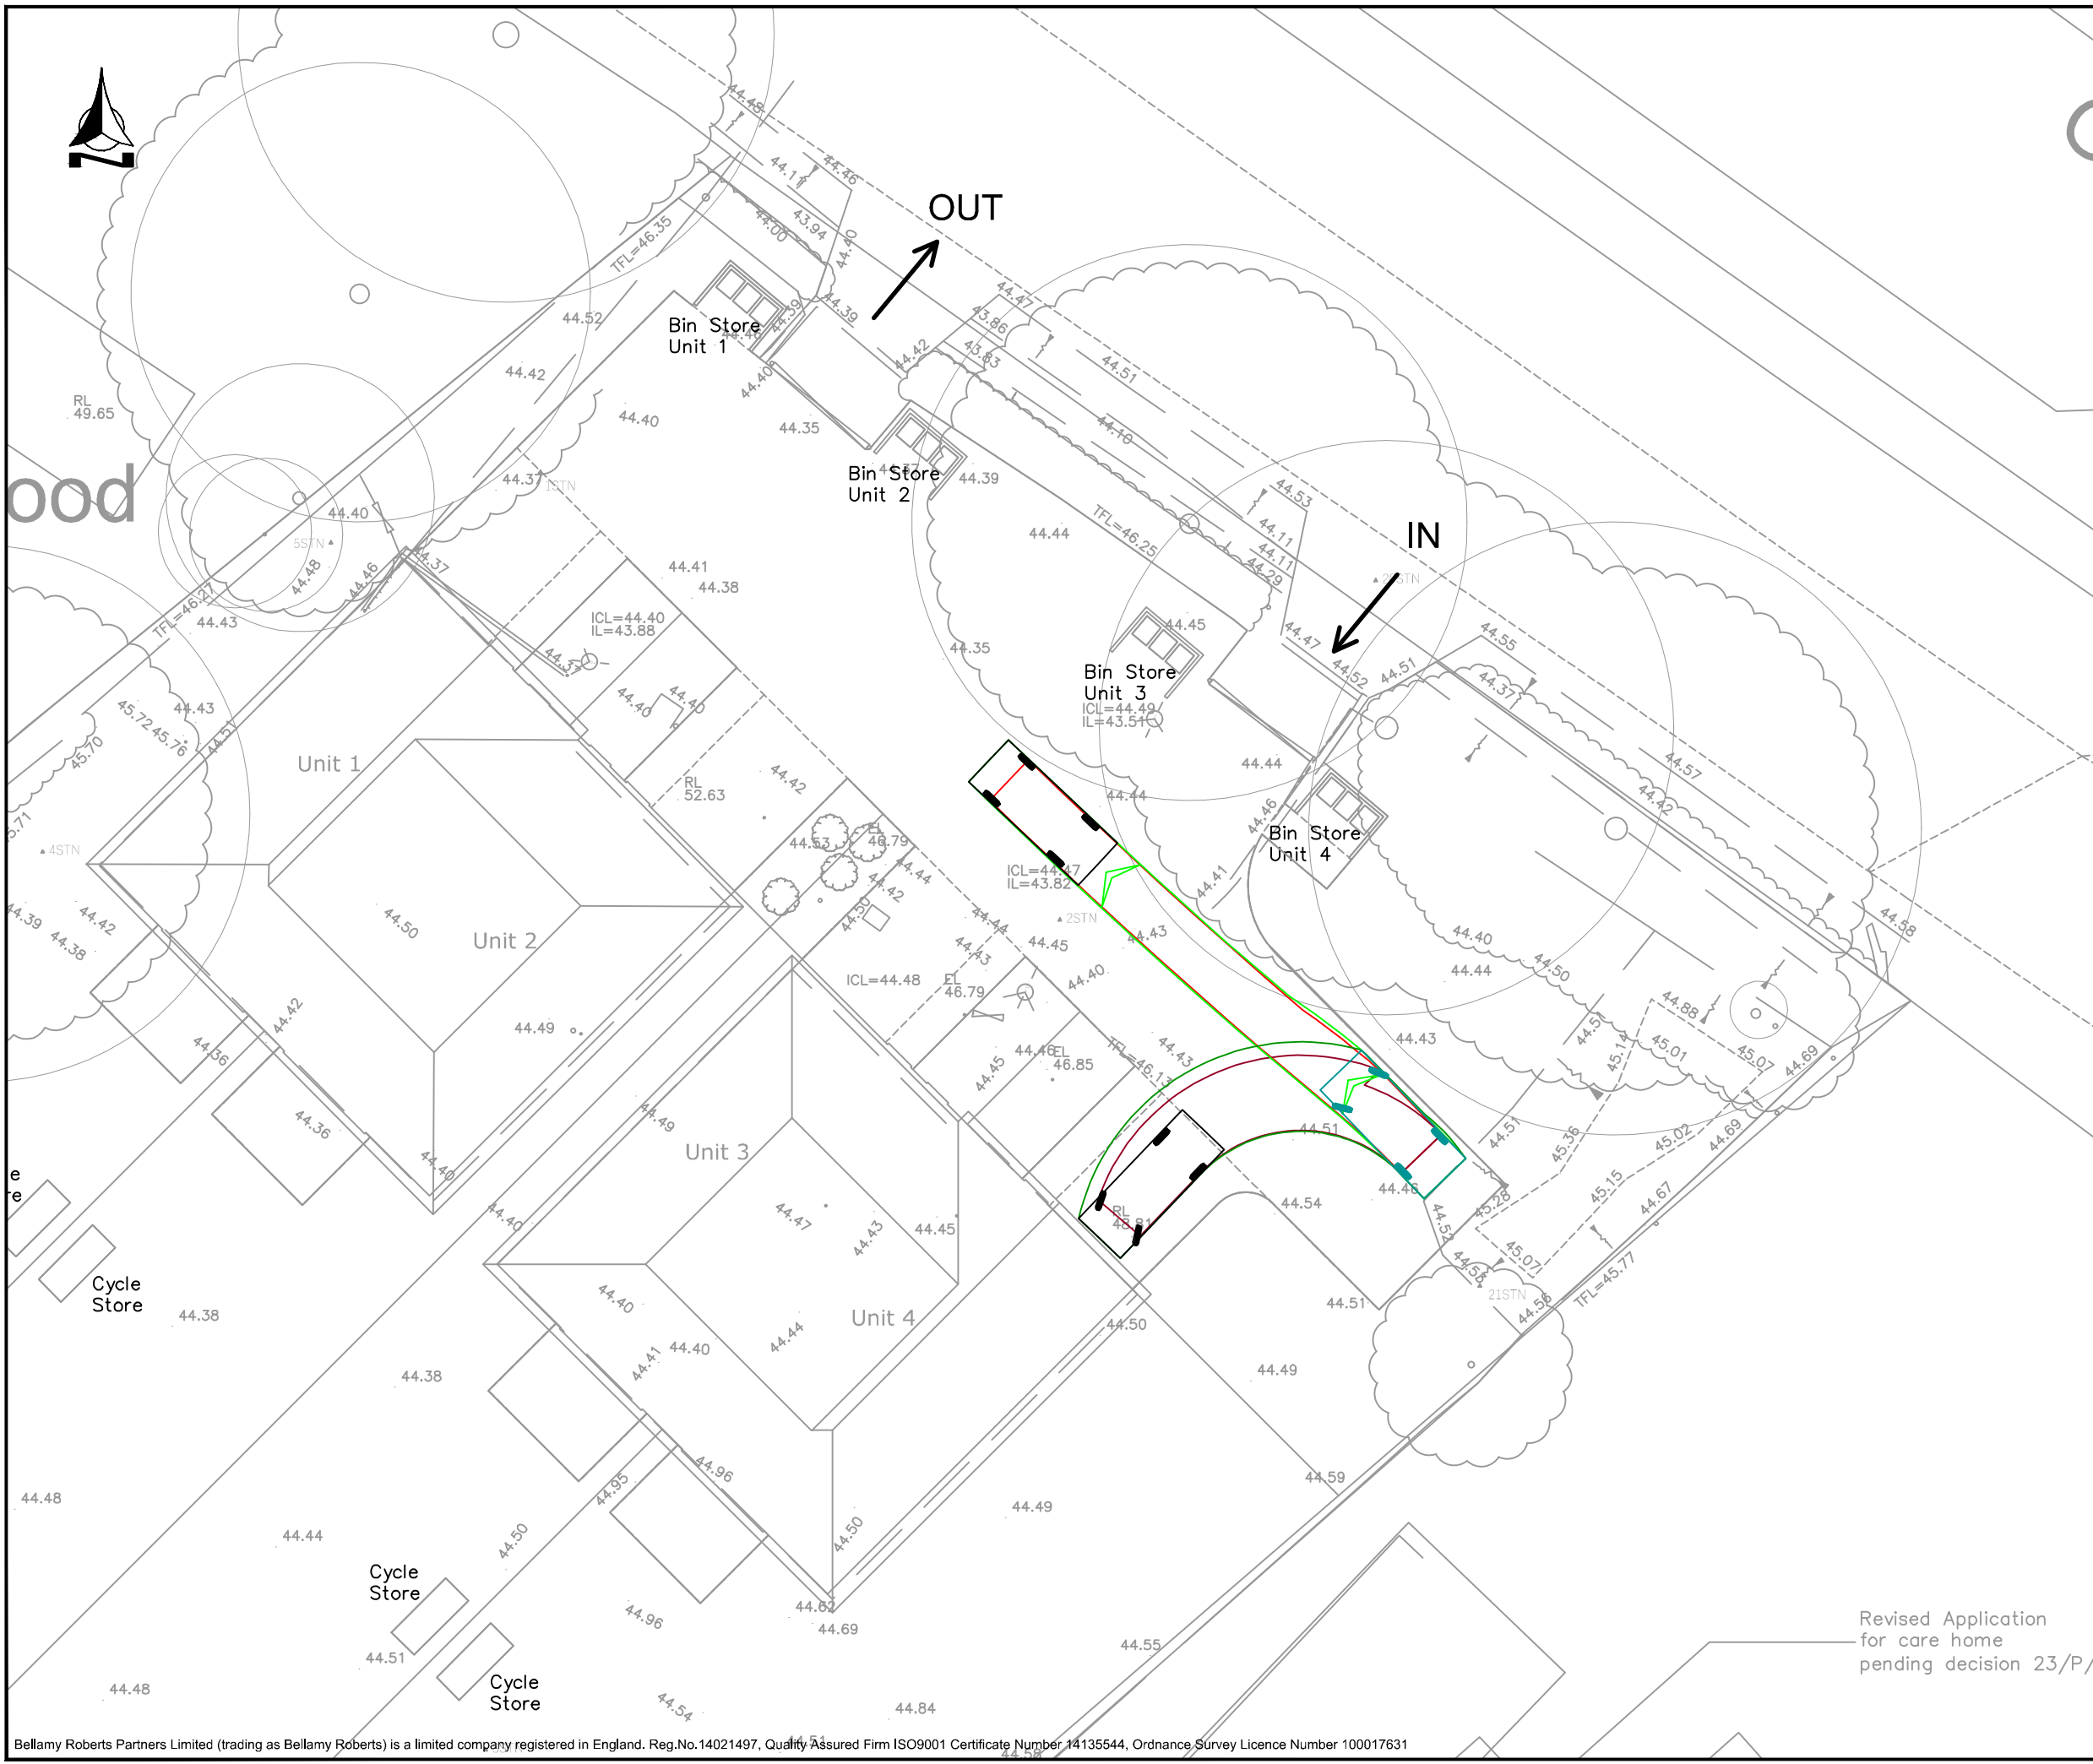

## Scheme F Classification Scheme (Non-metric)

Scheme F is an attempt to implement the FWHA's visual classification scheme as an axle-based classification scheme. This is one of several interpretations.

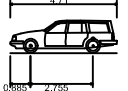

Class	Vehicle Type	No. of Axles	Axle spacing in feet				
			Axle 1 to 2	Axle 2 to 3	Axle 3 to 4	Axle 4 to 5	Axle 5 to 6
1	motorcycle	2	<6.0				
2	passenger car	2	6.0 - 10.0				
	car + 1 axle trailer	3	<10.0	10.0 - 18.0			
	car + 2 axle trailer	4	<10.0		<3.5		
3	pickup	2	10.0 - 15.0				
	pickup + 1 axle trailer	3	10.0 - 15.0	10.0 - 18.0			
	pickup + 2 axle trailer	4	10.0 - 15.0		<3.5		
	pickup + 3 axle trailer	5	9.9 - 15.0			<3.5	
4	Traditional bus/coach	2	>20.0				
	Traditional bus/coach	3	>19.0				
5	single unit truck/bus - dual rear axle	2	14.9 - 20.0			<3.5	
6	3 axle truck	3		<18.0			
7	4 axle truck	4					
8	2S1	3		>18.0			
	2S2	4		>5.0	>3.5		
	3S1	4		<5.0	>10.0		
9	3S2	5		<6.1		3.5 - 8.0	
	5 axle combination	5					
10	6 axle combination	6			3.5 - 5.0		
	3S3	6					
11	2S1-2	5		>6.0			
12	3S1-2	6					>10.0
13	truck	7 or more

*This section displays the number of survey days per TRICS® sub-region in the selected set*

**Primary Filtering selection:**

*This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.*

Parameter: No of Dwellings  
Actual Range: 8 to 50 (units: )  
Range Selected by User: 6 to 50 (units: )

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

**Public Transport Provision:**

Selection by: Include all surveys

Date Range: 01/01/15 to 09/11/22

*This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.*

**Selected survey days:**

Monday	3 days
Tuesday	6 days
Wednesday	8 days
Thursday	5 days
Friday	5 days

*This data displays the number of selected surveys by day of the week.*

**Selected survey types:**

Manual count	27 days
Directional ATC Count	0 days

*This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.*

**Selected Locations:**

Suburban Area (PPS6 Out of Centre)	9
Neighbourhood Centre (PPS6 Local Centre)	18

*This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.*

**Selected Location Sub Categories:**

Residential Zone	12
Village	15

*This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.*

**Inclusion of Servicing Vehicles Counts:**

Servicing vehicles Included	6 days - Selected
Servicing vehicles Excluded	22 days - Selected

**Secondary Filtering selection:****Use Class:**

C3 27 days

*This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order (England) 2020 has been used for this purpose, which can be found within the Library module of TRICS®.*

**Population within 500m Range:**

All Surveys Included

**Secondary Filtering selection (Cont.):**Population within 1 mile:

1,000 or Less	2 days
1,001 to 5,000	10 days
5,001 to 10,000	7 days
10,001 to 15,000	1 days
15,001 to 20,000	1 days
20,001 to 25,000	1 days
25,001 to 50,000	4 days
50,001 to 100,000	1 days

*This data displays the number of selected surveys within stated 1-mile radii of population.*

Population within 5 miles:

25,001 to 50,000	4 days
50,001 to 75,000	4 days
75,001 to 100,000	3 days
100,001 to 125,000	1 days
125,001 to 250,000	10 days
250,001 to 500,000	3 days
500,001 or More	2 days

*This data displays the number of selected surveys within stated 5-mile radii of population.*

Car ownership within 5 miles:

0.6 to 1.0	11 days
1.1 to 1.5	14 days
1.6 to 2.0	2 days

*This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.*

Travel Plan:

Yes	6 days
No	21 days

*This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.*

PTAL Rating:

No PTAL Present	27 days
-----------------	---------

*This data displays the number of selected surveys with PTAL Ratings.*

Covid-19 Restrictions	Yes	At least one survey within the selected data set was undertaken at a time of Covid-19 restrictions
-----------------------	-----	--

<b>Total Rates:</b>			<b>2.207</b>			<b>2.261</b>			<b>4.468</b>

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP\*FACT. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. The Company authorises those who possess a current TRICS licence to access the TRICS Database and copy the data contained within the TRICS Database for the licence holders' use only. **Parameter summary**

Trip rate parameter range selected: 8 - 50 (units: )  
 Survey date date range: 01/01/15 - 09/11/22  
 Number of weekdays (Monday-Friday): 27  
 Number of Saturdays: 0  
 Number of Sundays: 0  
 Surveys automatically removed from selection: 1  
 Surveys manually removed from selection: 0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
