

3 Hart Hill Lane, Luton, Beds LU2 0AZ

TPO- E107/063

The Multi Stemmed Sycamore Tree has Large cavities in the root System and is dangerous as shown in the photographs taken, branches that are damaged and decayed are snapping off into the road which is a potential Hazard.

This Tree needs to be felled as others in the area have too because of the same problem. The Tree is located at the front of 3 Hart Hill Lane, Luton Beds LU2 0AZ in a raised flower bed on the left hand boundary(as you look from the house)

Replanting will not be going ahead as the only place to Replant would be in the raised flower bed which is too close to the house, where there is potential to cause structural damage.
