

## Climate Emergency Compliance Form for householder applications

Householder applications are required to complete the relevant sections of this form. Any form with blank entries will not be accepted and the planning application will not be able to be validated until the form is complete.

It may be that not all of the requirements apply to your householder proposal, please look at each of the requirements and consider what can be achieved within your proposal. Please refer to the [Climate Emergency Planning Toolkit](#) if you need further information.

In the event that any of the requirements are not met in full, please explain why this is the case and identify any proposals to mitigate the impact of non-compliance. This may be because your proposal is too small, or of a particular type, and that the requirement isn't applicable – this needs to be briefly explained in the appropriate column.

Completion of this form is a validation requirement and the local validations lists have been updated to include this.

<b>Climate Emergency Compliance Form</b>			
<b>Requirement</b>	<b>Is the requirement being met onsite?</b>	<b>If 'in full or in part', which document/plan is the evidence included in;</b>	<b>If 'not' or 'in part', please explain reason for non-compliance and identify any measures you are proposing to mitigate for the non-compliance</b>
	<b>In full (F)</b>  <b>In part (P)</b>  <b>Not at all (N)</b>		
<b>Mitigation</b>			
M1 – Min 1kw of onsite renewable energy generation		<i>(Panels shown on roof plan and elevations)</i>	The applicant is intending to raise the existing flat roof. The budget involved does not allow for renewable energy sources.
M4 – Resilient and low carbon building materials		<i>(Proof of slate origin and warranty period)</i>	<i>(May not apply if we aren't prescribing that natural slate needs to be used for conservation or heritage reasons.)</i>

			We are not within a conservation area and the proposal relates to a flat roof rear extension. Resilient and lowcarbon building materials are used where possible.
M6 – Electric vehicle charging points		(Shown on plan if extension is adjacent to parking space. Should be shown as a minimum 7kw charger.)	(Will not be applicable if the proposal isn't adjoining an existing off-road parking space) The proposal does not relate to any parking. We are proposing to extend to the rear.
<b>Adaptation</b>			
A1 – Passive solar design (All apps)	N/A	Additional documentation not required whilst this measure is under review.	Additional documentation not required whilst this measure is under review.
A2 – Protecting our soil resource (All apps)		(Supporting statement if applicable)	NA. Proposal will not affect soil.
A3 – Protecting and enhancing tree cover (All apps)		(Supporting statement if applicable)	NA. Proposal will not affect tree cover.
A4 – Protecting and enhancing gardens, green spaces and greenfield sites (All apps)		(Supporting statement if applicable)	NA. Second story extension will not affect green spaces.
A5 – Delivering sustainable drainage, surface water management and restricting urban creep (All apps)		(Supporting statement if applicable)	NA. The proposal will not increase the area of roof and will be connecting to the existing drainage system.
<b>If an offsetting contribution is being proposed to mitigate the impacts of non-compliance, please refer to the most up-to-date Greater</b>
