AECOM019	SE 70329 27453	Unknown	Small number of linear features and a possible circular feature identified as part of the geophysical survey and aerial photographic review in Fields 206 and 207. Do not follow the pattern of post-medieval field systems and potentially late prehistoric.
AECOM020	SE 72228 29299	Unknown	Linear feature identified through review of LiDAR data in Field 191. In area of retting ponds (MHU22306) as well as other features and field boundaries, so possibly linked to drainage or field systems in the area.
AECOM021	SE 72204 29282	Post-Medieval	Possible Holloway and embankment identified through LiDAR survey in Field 192. Latter feature may be linked to land drainage/management, and could be a continuation of warping drains recorded on the 1 st edition OS mapping of the area.
AECOM022	SE 74469 30338	Post-Medieval	Linear features identified in Field 185 through a review of aerial photography and LiDAR data. Possibly linked to field systems, although more substantial linear feature might be associated with Mote Chapel site so south-east (MHU1760).
AECOM023	SE 73596 30326	Post-Medieval	Number of linear features recorded through a review of aerial photos in Fields 186 and 187. Assumed be to be field boundaries/associated with field systems in area.
AECOM024	SE 73212 30074	Post-Medieval	Linear feature in Field 188 recorded as part of a review of LiDAR data. Does not fit with post-medieval field system, but could also be more recent and linked to willow plantation.
AECOM025	SE 75184 30651	Post-Medieval	Short section of dismantled railway recorded on modern mapping and picked up as part of the LiDAR and aerial photographic review in Field 182. Not on the first edition OS mapping, but possibly a short-lived railway linking the main line to the Howden Brick and Tile works in the north.
AECOM026	SE 76157 30886	Roman	Extensive remains of a possible Roman settlement recorded through aerial photography in Field 179. Slight traces also recorded through the geophysical survey (geophysical survey site AAA12). Probably part of site MHU3198.
AECOM027	SE 77701 31663	Post-Medieval	Traces of ridge and furrow cultivation recorded through review of aerial photography in Field 178.
AECOM028	SE 77364 31540	Unknown/Modern	Possible small enclosure recorded through geophysical survey in Field 178. Large concentration of 20 th century military buttons and fittings found in same area.
AECOM029	SE 78523 31984	Post-Medieval	Small area of ridge and furrow recorded as part of the aerial photographic review in Field 175.
AECOM030	SE 78734 32113	Romano-British	Remains of possible field system recorded through a review of aerial photography in Fields 173 and 174. Possibly Romano-British based on other remains in the wider area, although the geophysical survey suggested field drains.

Reference	Grid Reference	Period	Description
AECOM031	SE 79443 33257	Romano-British	Traces of possible field system recorded through geophysical survey. Very fragmentary.
AECOM032	SE 86828 38902	Iron Age/Romano-British; Post Medieval	Large complex including field system and possible structures recorded as part of the RCAHME survey and through the aerial photographic review undertaken as part of the scheme. Covers a large area (Fields 142-146), although very little is evident in the geophysical survey data. Possibly a continuation of MHU7347.
AECOM033	SE 87491 39400	Roman	Alignment of Roman road recorded through aerial photographs and projected on landscape by Ordnance Survey. Possibly linked to settlement remains to west (AECOM032), and Roman road recorded as point data on HER (MHU63).
