

Planning application for a detached garage.

The above property known as 6 Woodruff is a 1950s built detached bungalow, the surrounding properties are mainly bungalows and a few houses all of a modern design built in the 1930s and 1950s, there are no period properties in The Orchard which is a private road in bad state of repair. The proposed garage/workshop is designed to blend in with the surrounding properties and the height has been kept low so not to impact of the next property.

I will forward photos showing showing the surrounding properties
