

To Whom IT may concern,

Request for permission to pollard my TPO tree in the front garden.

16 Wallis drive
Bramley
Tadley
RG26 5XQ

This is part of a 5 yearly maintenance routine to manage the trees size and growth. The reason for this requirement is that the tree is very close to the sewage and grey water pipes that run under ground. By regularly (every 5 years) pollarding the tree we can minimise the risk of damage to the pipe works.

The tree is about 10m high and has a diameter of about 8m. After the work is completed it should be around 6m high and 4m wide. This was the size of the tree about 5 years ago.

I am the home owner and the tree is on my property.

The work will be carried out by professional tree surgeons.

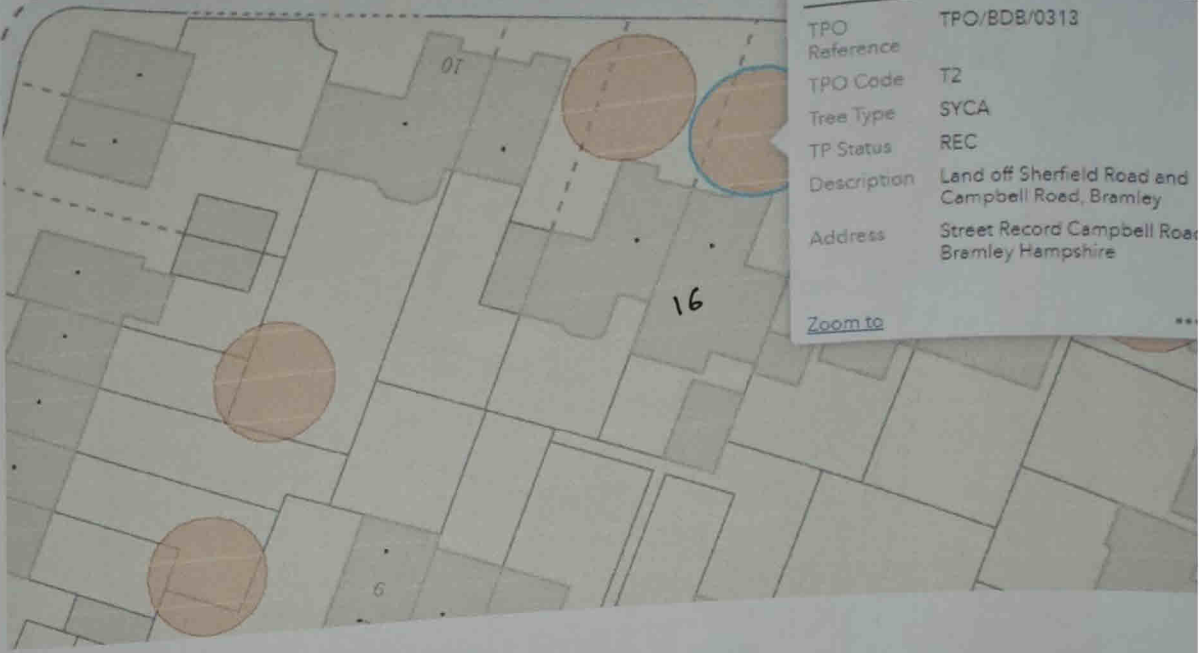

Thanks for your time,

[REDACTED]
