Dear Emma

Thank you for your email.

Please find attached photograph taken by Truro Tree Services in August 2023. There appears to have been some miscommunication between myself and Truro Tree Services and we have both submitted applications.

After submitting application I discovered that the developer had gained permission to remove the same Ash Tree as part the the application PA20/09815 to build the 5 new properties. This was referenced as T5 on the tree report and Tree Protection and Landscape Plan relating to that planning application with a recommendation to remove and replace. The developer tells me that the decision was made not to remove the tree last spring prior to sale to provide a little privacy to the rear garden; however as this tree was deemed as having no sustainable future in the report and has since been confirmed as suffering from Ash Die Back I trust there will be no objection to it being felled.

The 4 No Sycamores we wish to fell belong to group T4 of the report and are poor specimen.

Please accept my apologies for any confusion.

Kind regards

Elaine Rapps
