

Cluster at East end of south side of garden with considerable bark loss and irregular trunk shapes. (note most current foliage is Ivy and holly) March 2024. Note these are quite close to the Major Houses #4 & #6 College Rd (circa 3m guess TBC)

FROM A SUMMER VIEW from the house. Tree(s) based in South west end of #6 Garden on boundary to #4 College rd , showing considerable dead material among a lot of Ivy etc at height. (This is also close to the Worcester Crescent Boundary, but not as close as #4 which is overhung)

South West end of garden at ground level, March 2024 . Right hand trunk stem direction in particular worrying (see also next frame) . Shed is in adjacent property #4, to south. Green Foliage is Ivy and Holly.

Fallen Bough leaning on West boundary wall with Worcester Crescent in South West Corner of garden , March 2024. Boundary #4 college road is to left Ivy and holly in foreground .
