Description of Proposed Works

Please describe the proposed works

The proposal consists of creating a new rear extension at ground floor level to offer new kitchen and dining spaces. The new extension consists of a side infill towards the rear of the property and an extension on the ground floor of the outrigger. We propose for the new extension to be a single storey with an asymmetrical sloping roof. The new extension is designed to complement the existing architecture, drawing inspiration from the slanted roof of the closet return. By incorporating asymmetrical angles into its profile, the extension maintains a cohesive visual connection with the rest of the structure while also adding a unique touch. This approach can create an interesting interplay between old and new elements, enhancing the overall aesthetic appeal of the property.

Biodiversity net gain

Householder developments are currently exempt from biodiversity net gain requirements.

However, this exemption still needs to be confirmed by the applicant or agent when making a householder planning permission application.

I/we confirm that the proposed development, if granted permission, would be exempt from the general biodiversity gain condition.

Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended) sets out that every planning permission granted for the development of land in England shall be deemed to have been granted subject to the 'general biodiversity gain condition'.

However, the 'general biodiversity gain condition' does not apply in relation to planning permission for a development which is the subject of a householder application, within the meaning of Article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended).
