

SOILS MANAGEMENT PLAN

Cavalliers Hill, Shirnall Hill,
Upper Farringdon, Alton, Hampshire, GU34 3DS
Application No : SDNP/24/00746/HOUS

Proposal: Single storey extension

As the application is proposing the movement of top and/ or subsoils from areas of new extension works, the applicant is required to provide a Soils Management Plan.

The footprint area of the proposed extension will have topsoil removed.

The soil dug will be retained on the site and reused in flowerbeds, and planters. The proposal involves the movement of relatively small quantities of topsoil and subsoil and there is no intention of removing any soil from the site.

Any topsoil excavated during construction will be displaced elsewhere within the site. No soil will be removed from the site.
