

## **SPECIES ENHANCEMENT STATEMENT**

### **Location and positioning of bird and bat boxes to follow recommendations - as per the planning condition:**

*"The following recommendations should be the subject of planning conditions:*

*- In order to increase the diversity of the site for bats, an integral bat roost feature should be included in the south and west elevation of the proposed houses. Permanent roost features should be sited high up (above 4m) and away from windows.*

*A sparrow nesting terrace should be included on the north elevation and possibly a swift box on the south elevation of each of the two dwellings".*

### **Bird nesting features**

The Swift nest box proposed is a surface fixed timber box by the RSPB R421069.
