24th February 2024,

Dear Sonia,

Thank you for speaking to me today regarding the LISTED BUILDING CONSENT application for window replacement at the above property.

As you advised I spoke to the PLANNING PORTAL helpline, and they could not understand how the application I had submitted had the heading CART LODGE AND GARAGE planning! But when I accessed the application form and altered the site plan as you requested to show the site in BLUE rather than red, I noticed that somehow in one of the sections was written CART LODGE AND GARAGE!!! How this occurred is a mystery, I have now changed this and the form has been resubmitted.

Having re read your email regarding the boundaries to the property am still not sure if it is red or blue outlines that you require. So am sending both!

I have enclosed a paper application form with photographs, a heritage and design and access statement and a site plan, to be used if the online application still contains errors.

I will email HARLESTON JOINERY and get them to email drawings of the proposed designs.

One final issue is that I dropped off to your office some paper elevation plans on which I was going to indicate which windows were for replacement, when I explained that I had not done this I was told that your office could do this by cross referencing with my submitted photographs. If this is not possible would you please let me know so that I can collect the plans and annotate them for you.

Yours sincerely
