

## **MATERIALS LIST**

### ***Renovation and extension of existing 'Brook Hall Bungalow'***

The following list of some of the more important items to be used in the renovation and extension of Hall Bungalow:

**Windows and doors** – These will be painted timber casement style windows, with doors to match.

**Bricks** – Any brick repairs/stitching needed around windows and door to the existing sections of the property will use traditional reclaimed red bricks, hopefully those saved when new openings are created elsewhere in the building. The new extensions will be built using Imperial Brick company 'reclamation soft red' bricks.

**Tiles** – The North, South and West elevations of the property, those seen most from the property surroundings, will be tiled using the existing tiles on the property as it currently stands. The courtyard area will be tiled using Crest wolds 'toscana' clay pan tiles.

**Fascia and barge and soffit boards** – these will all be painted timber.
