

Refuse & Recycling Statement

3 x 240 litres Wheelie bins to be provided for the proposed use.

(1 x 240 litre green-topped wheeled bin for organics recycling (food and garden waste),

1 x 240 litre blue-topped wheeled bin for mixed dry recyclables and

1 x 240 litre black-topped wheelie bin for general waste).

So, a total of 3 x 240 litres will be provided in total.

The waste and recycling wheelie bins will be located to the front of the proposed development which is within the confines of the property boundary and not on the public highways.

Bin dimensions for a 240 litre wheeled bins has Height: 1063mm, Width: 720mm and Depth: 800mm.

The storage facilities provided have sufficient storage space for waste and recycling materials to be stored for seven days. The Storage areas have been designed to accommodate the wheeled bins “side by side” and not “end to end” to allow use from the front of the bin.

During collection days, bins would be moved to bin collection point at the rear of the site close to the road pavement along Bexley Road by the occupier of 168 Bexley Road where waste collection vehicles would be parked at safe vehicle stopping location whilst collecting waste.

This safe waste stopping location has been used to collect waste for the existing premises at Bexley Road for a very long time. Access route for waste collection vehicle is on Bexley Road.
