Commenter Type: Other

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: Dear SDNPA

This application must be supported for a number of reasons:

1. To bring us inline with all the other local event spaces in the area that can all have music until 11.00pm, some even past that.
2. It will bring the music in line with our alcohol license which is also 11.00pm, and what all other businesses have in the local area.
3. Being able to use our INSIDE space for a range of events during the winter months will massively help our farm finances, and currently we are limited on the type of events due to the 10.00pm condition.

To mitigate we have lowered the agreed limit in the original Noise management plan, and will also install a noise limiter which automatically switches off any music if it goes over the limit set.

Nothing any other local business is required to have, but will ensure our neighbours are not effected.

To repeat what was in our original application.

Our event space is for a wide range of events ranging from:

Educational and school visits

Specialist food and drinks nights with buskers

School holiday events for young children

farmers markets

Craft stalls

Private hire

Music and comedy nights

This facility is a great addition to our farm experience, and should be able to help us grow and maintain our lovely farm and all the great work it does. We need the SDNPA to understand how the change in this condition will benefit our family run farm.

Many thanks

S.Macmillan
