Information (139 pages)

1. Introduction

Meadow Environmental Consulting (MEC) were instructed by Square Circle Developments Limited to carry out an updated risk assessment (including the proposals for remediation), carry out a visual assessment of the site, carry out further chemical analysis of the soils if required, act as a watching brief and compile a verification report (LCRM Stage 3, Steps 1 to 3) of the site at: 14 Suffolk Avenue, Westgate on Sea, near Margate CT8 8JG (grid reference at the development area centre 631943 169352). The site is approximately 24 metres above ordnance datum (AOD) in the town of Westgate on Sea, Kent.

The site was occupied with two large commercial units and a smaller unit that were used for furniture manufacture with associated offices, storage areas and off road parking areas.

It is proposed to develop the site with 12N^o two bedroom houses in two terraces (1x3, plots 12 to 14 and 1x9, plots 15 to 23) in the south area with a terrace of 3N^o one bedroom houses (plots 9 to 11) and 8N^o two bedroom maisonettes (2N^o terraces, plots 1 to 8) in the north area. The north and south areas are divided by an access road off Suffolk Avenue and Linksfield Road. The site will be developed in two phases. The south area will be phase 1 and the north area phase 2. However, a slight amendment to this proposal was made in April 2023 for an additional plot (plot 24) to the terrace of plots 9 to 11.

The original proposed development has been approved by Thanet District Council (TDC), reference F/TH/18/1109). The revised proposal for the addition of plot 24 has been submitted to TDC and is awaiting approval (TDC reference F/TH/23/0506).

Site plans showing the site location, former layout and proposed layout (including the updated proposal for plot 24) is shown in appendix 1, site plans (p1 and p2).

The LCRM Stage 1, Tier 1 Risk Assessment (desk study) and Stage 1 Tier 2 Risk Assessment (intrusive) investigation reports were carried out by HSP Consulting Engineers Limited (HSP) in December 2020 and April 2021 respectively. The intrusive investigation report concluded that generally there were no elevated levels of contaminants on the site that were likely to impact human health or controlled waters and the overall environmental risk was low.

However, there was made ground on the site and a clean cover system should be provided in soft landscaped areas (private gardens). No gas (ground gas or radon) protection measures would be required. The report recommended that following the demolition of the buildings further geotechnical investigation work should be carried out. This was the only further work recommended and no remediation of the site was required apart from the clean cover system for the private gardens/soft landscaped areas.

2. Updated Risk Assessment

The risk assessment carried out by HSP in the intrusive investigation report was based on the most sensitive end use scenario i.e. residential with homegrown produce.

However, due to the proposed landscaping plan (see section 2.1) the residential with homegrown produce end use for the site is not the most applicable scenario. Additionally, there will be four very small areas of communal public open space landscaping for the planting of new trees.

The four small communal public open space areas where trees will be planted in the south area (phase 1) and site entrance also do not require the clean cover capping system proposed in the HSP report. The updated risk assessment concluded that there are no contaminants at unacceptable levels in these areas.

MEC carried out an updated risk assessment, visual assessment of the site and issued a report on the 26th January 2023. The report also included the proposals for 'remediation' i.e. for the proposed garden areas.

The report was subsequently submitted to TDC and was approved on the 29th March 2023. A copy of the TDC approval of the updated risk assessment, visual assessment and proposals for the private gardens report is shown in appendix 2, correspondence. Also in appendix 2 is a copy of the updated risk assessment, visual assessment and proposals for the private gardens report, which also includes the F/TH/18/1109 decision notice.

2.1 Proposals for the Proposed Gardens and Soft Landscaped Areas

The site was attended by MEC on 18th January 2023 for the visual assessment. It was confirmed by the client during this site visit that there will be no soft landscaping on the site in the private garden areas. The private gardens for the houses in the south area (phase 1) and plots 9 to 11 (now to include plot 24) in the north area (phase 2) will be hard cover comprising of a small patio with an area of artificial grass.

The gardens will be reduced to formation level and then laid with 0.10m of compacted Type 1 sub base, with a 0.025m sand screed over the sub base and the artificial grass laid over. The maisonettes in the north area (phase 2, plots 1 to 8) will have a small patio and artificial grass garden areas at ground level, mostly fully enclosed and roof terrace 'gardens'.

Where required, raised planters will be utilised around the communal areas on the site other than the small soft landscaped areas proposed for tree planting.

2.2 Verification

TDC have confirmed that the verification of the each phase of the development can be reported and submitted separately to allow for the sale of the properties. A copy of the email confirming this is in appendix 2.

The private garden areas proposed for artificial grass (all plots) will comprise of the following:

Compacted Type 1 sub base minimum 0.10m

Sand Screed minimum 0.025m

Artificial grass finish (overlying the type 1 and sand).

For verification, photographs of the 'construction' of the artificial grassed areas at each stage of the process were taken. The photographs are shown in appendix 3, site photographs.

No soil analysis is required for the purposes of verification.

2.3 Excavated Soils

The proposed private garden areas and other areas of the site were reduced to formation levels for construction purposes. Additionally arisings were produced from the foundation excavations and the installation of the new surface water soakaways.

The excavated soils from phase 1 (plots 12 to 23) were removed as follows:

83 loads were removed by Thanet Waste Services from the 15th November 2022 to the 22nd December 2022 and with the exception of 4 loads, were all taken to the Sheerness Recycling Limited site at Hythe, Kent. The other 4 loads were taken to the Thanet Waste site at Richborough, near Sandwich.

30 loads were removed by TD Express (Borough Green Sand Pits) from the 5th January 2023 and the 27th January 2023 and taken to various sites at, Sheerness Recycling Limited at Hythe, Kent, the Thanet Waste site at Richborough, the Attwood's site at Minster (Sheppey), the Borough Green Sand Pits site and the Medway Preservation Developments Limited site at Strood.

An additional 12 loads were removed from the site by Paul May Transport and Paul Taylor Haulage between the 20th and 23rd of November 2023.

The soil was taken to the following sites as follows:

4 loads to a site at Maidstone (20/11/23)

8 loads to a site at Sandwich, presumed to be Richborough (23/11/23)

Copies of the waste transfer information as supplied to MEC are shown in appendix 4 (exported and imported material information).

2.4 Imported Soils

Imported topsoil was used for the top dressing for the small areas of communal open space/planting.

A copy of the imported topsoil information as supplied to MEC is shown in appendix 4. Mark Luck Limited delivered 1N^o 10t load of topsoil to the site on the 21st November 2023.

3. Conclusions

3.1 Results

From the work carried out on the site as proposed in the updated risk assessment and visual assessment report there are no contaminants remaining on the phase 1 area of the site at unacceptable levels that are likely to impact human health.

A copy of this report should be forwarded to Thanet District Council or other regulators/insurers if applicable for their consideration and approval.

Proposed Site Plan
Scale 1:200

Proposed Site Location Plan
Scale 1:1250

- Tarmac to roads and pavements
- Pea shingle bonded into tarmac to parking area
- Marshalls Brindle block paving to parking bays
- Paving slabs
- Artificial grass
- 1.8 x 2.4m shed / bike storage
- Bark mulched areas and shrub planting
- Pebbles
- Raised planting beds with shrubs. Mix of:
Rosa pimpinellifolia (burnet rose)
Ruscus aculeatus (butcher's broom)
Salix herbacea Salix lanata AGM (woolly willow)
- Existing Trees Retained (including those off site)
- Existing Trees Removed
- New Trees
- New fully mature hornbeam hedge (pre-formed hedge installed in sections) (Intra green arbor-raft installed under road, to allow root growth without compaction)
- Bin store
- 1m high railings to provide private secure play space to the front of each property (plots 1-8 only)
- 1.8m high close boarded fence, with 150mm gravel boards and concrete posts to form garden boundaries (plots 9-23)

Dear Mr Mark Bouch

TOWN AND COUNTRY PLANNING ACT 1990

PROPOSAL: Application for approval of Condition 3 Parts 2 and 3 (Contamination) attached to Planning Permission F/TH/18/1109 for the change of use from light industrial (use class B2) to residential (use class C3) with erection of 12No. 2 bedroom dwellings, 8no. 2 bedroom maisonettes, and 3No. 1 bedroom dwellings, with associated parking and landscaping, following demolition of existing office building, showroom buildings and manufacturing/storage buildings

LOCATION: 14 Suffolk Avenue, Westgate On Sea, Kent, CT8 8JG,

The Thanet District Council, as District Planning Authority, has now considered details submitted pursuant to conditions attached to the above mentioned planning consent.

I would confirm that the following conditions attached to planning consent reference number F/TH/18/1109 have now been approved:

Condition No's –

3 Contamination - Parts 2 and 3

The details contained within the following document, Received 31st January 2023, is considered acceptable

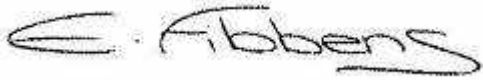

Updated Risk Assessment, Visual Assessment and Proposals for Private Gardens, Compiled by Meadow Environmental Consulting, Dated 26th January 2023.

You should also refer to the decision notice for all conditions that do not require the submission of details but remain in force.

Proposed Development

It is proposed to develop the site with 12N^o two bedroom houses in two terraces (1x3, plots 12 to 14 and 1x9, plots 15 to 23) in the south area with a terrace of 3N^o one bedroom houses (plots 9 to 11) and 8N^o two bedroom maisonettes (2N^o terraces, plots 1 to 8) in the north area. The north and south areas are divided by an access road off Suffolk Avenue and Linksfield Road. The site will be developed in two phases. The south area will be phase 1 and the north area phase 2. Proposed site roof plans are in appendix 1, site plans, as well as the ground floor landscaping plans of phase 1 and 2 and first floor plan of the maisonettes (plots 1 to 8).

The areas shown as artificial grass will be finished with either artificial grass or gravel to the buyer's choice if the properties are bought 'off plan'. Otherwise these areas will be artificial grass.

There are four small areas that are marked for new trees, which are small communal areas near to the new houses in the south area and one small area adjacent to plot 9 at the site entrance off Suffolk Avenue.

The expected bedrock geology underlying the site is The Margate Chalk Member (marl free chalk with little flint) with head superficial deposits (clay and silt).

Surface water drainage will be discharge via a large soakaway that will be installed in the south area. Foul water will be discharged via the local mains system.

Previous Investigations

The LCRM Stage 1, Tier 1 Risk Assessment (desk study) and Stage 1 Tier 2 Risk Assessment (intrusive) investigation reports were carried out by HSP Consulting Engineers Limited (HSP) in December 2020 and April 2021 respectively. The intrusive investigation report concluded that generally there were no elevated levels of contaminants on the site that were likely to impact human health or controlled waters and the overall environmental risk was low. However, there was made ground on the site and a clean cover system should be provided in soft landscaped areas (private gardens). No gas (ground gas or radon) protection measures would be required. The report recommended that following the demolition of the buildings further geotechnical investigation work should be carried out. This was the only further work recommended and no remediation of the site was required apart from the clean cover system for the private gardens/soft landscaped areas.

Updated Risk Assessment of the Previous Intrusive Investigation

The risk assessment carried out by HSP in the intrusive investigation report was based on the most sensitive end use scenario i.e. residential with homegrown produce.

However, due to the proposed landscaping plan the residential end use for the site is not the most sensitive scenario. Additionally, there will be four very small areas of communal public open space landscaping for the planting of new trees (see the site plans in appendix).

South Area: The analysis results from the boreholes drilled in this area that will be at or near the private gardens (WS05 and WS06) are all below the respective soil guideline value (SGV) for residential end use without homegrown produce. Additionally, the gardens in this area will be patio slabs with an artificial grass area and there will be no pollution pathway on completion of the development.

South Area Communal Public Open Space Areas: The analysis results from the borehole drilled in the south area that will be at the location of one and near to another of the small public open spaces near the residential houses for tree planting (WS01) are all at or below the respective soil guideline value (SGV) for a public open space near to residential housing within the made ground in this area. This includes the elevated lead at 630mg/kg (reference Contaminated Land Applications in Real Environments (CL:AIRE) C4SL 2014 – Category 4 Screening Level) and the two slightly elevated polyaromatic hydrocarbon levels for benzo(b)fluoranthene and dibenz(a,h)anthracene (reference Land Quality Management (LQM)/Chartered Institute of Environmental Health (CIEH) suitable for use levels (S4UL's)).

North Area: The analysis results from the boreholes drilled in this area (WS02 and WS03), which will be one of the private gardens (WS02) and within the footprint of the new dwellings (WS03), had slightly elevated levels of polyaromatic hydrocarbons in two samples of made ground (one from each location) and slightly elevated lead at one location (WS03). WS03 is within the footprint of the new dwellings and the levels found are unlikely to impact human health, including the construction personnel. The slightly elevated polyaromatic hydrocarbons found within the made ground at 0.20m at the location of WS02 are likely to be removed to achieve formation levels for the garden areas, will also be patio slabs with artificial grass, and there will be no pollution pathway on completion of the development. It should also be noted that no elevated levels of contaminants were found in the sample taken at 0.50m at the location of WS02, which is also made ground.

Environment Agency Comments

The Environment Agency (EA) recommended in their letter dated 19th May 2021 shown in appendix 2, correspondence, the partial discharge of conditions 3 and 4 (contamination and verification following remediation) of the granted planning conditions (planning reference F/TH/18/1109), which is also in appendix 2. The EA recommended that “...once the site is cleared, as well as further geotechnical assessment, it is recommended confirmatory tests should be made of any ground exhibiting discolouration or odours”.

Thanet District Council Comments

The environmental protection team (EP) at Thanet District Council (TDC) in their email to the TDC planning department dated 21st June 2021 shown in appendix 2, also agreed with the conclusions of HSP intrusive investigation report. EP also specified the details for the clean cover system for the soft landscaped areas “.....that where Made Ground is left in-situ in proposed residential gardens or areas of soft landscaping, a suitable clean cover system should be provided. In garden areas, this should be of a minimum of 600mm thickness comprising 150mm topsoil and 450mm subsoil and within soft landscaping areas this should be of a minimum of 450mm thickness comprising 150mm topsoil and 300mm subsoil....”. The letter from TDC dated 23rd June 2021 partially discharging conditions 3 and 4 as well as referring to the EA letter dated 19th May 2021 is also in appendix 2.

Site Works Carried Out

Meadow Environmental Consulting (MEC) was instructed by Square Circle Developments Limited (the client) to carry out the site reconnaissance and assessment following the demolition of the buildings and the removal of all hard cover where required.

The site was attended by MEC on 18th January 2023. It was confirmed by the client during this site visit that there will be no soft landscaping on the site in the private garden areas. The private gardens for the houses in the south area (phase 1) and plots 9 to 11 in the north area (phase 2) will be hard cover comprising of a small patio with an area of artificial grass. The gardens will be reduced to formation level and then laid with 0.10m of compacted Type1 sub base, with a 0.025m sand screed over the sub base and the artificial grass laid over. The maisonettes in the north area (phase 2, plots 1 to 8) will have a small patio and artificial grass garden areas at ground level, mostly fully enclosed and roof terrace ‘gardens’. Where required, raised planters will be utilised around the communal areas on the site other than the small areas for tree planting.

The former buildings had been demolished and the site completely cleared in the south area. The strip foundations had been laid for the terrace of nine houses (plots 15 to 23) with the main area of the houses approximately 0.5m to 1.0m lower than the original ground level (also see the photographs enclosed) and the construction of the terrace of three (plots 12 to 14) was well underway. The exposed soils were the expected superficial geology of head deposits – firm brown/orangey brown SILTY CLAY. There were no areas of visible or olfactory contamination i.e. areas of staining/discolouration or odours.

The demolition of the building in the north area was near completion with much of the hard cover in place for construction purposes. There were some areas of exposed soil, also of head deposits. Stored in the north area were spoil heaps from the south area awaiting removal from the site. There were no areas of visible or olfactory contamination in this area.

Photographs of the site taken during the site visit on the 18th January 2023 are shown in appendix 3, site photographs. Also in appendix 3 are photographs of the site during the groundworks in the south area and the excavation for the surface water soakaway that were taken by the client.

Proposals

Discovery Strategy/Watching Brief – A discovery strategy and watching brief will be in place throughout the remainder of the groundworks. Should any unsuspected contamination be encountered i.e. discolouration or odours of the soils, the groundworks should cease in that area of the site, the area cordoned off and the watching brief contacted immediately. MEC has agreed to act as a watching brief. The suspect area will be investigated, assessed and remediated if required. The details and report of the further investigation work will then be submitted to TDC for their approval before the construction work recommences in that area of the site.

Photographs – Photographs of the north area of the site immediately before the foundations are laid will also be taken to be included in the final verification report.

Artificial Grassed Gardens – The private garden areas proposed for artificial grass (all plots) will comprise of the following:

Compacted Type 1 sub base minimum 0.10m

Sand Screed minimum 0.025m

Artificial grass finish (overlying the type 1 and sand).

Photographs of the ‘construction’ of the artificial grassed areas at each stage of the process will be taken that will be included in the final verification report.

The clean cover capping system proposed in the HSP report will not be required in these areas. With the patio and artificial grass in place there will be no soft landscaping and no pollution pathway on completion of the development in the proposed garden areas.

The use of artificial grass instead of a clean cover capping system will significantly reduce the potential environmental impact from soil movements from the site to landfill, imported soils to the site and transport movements in the area to and from the site during the earthworks.

Maisonettes – The maisonettes in the north area (plots 1 to 8) will also have roof terrace gardens. Raised planters will be in the communal areas around the buildings as required.

Soft Landscaped Tree Planting Areas – The four small communal public open space areas where trees will be planted in the south area and site entrance also do not require the clean cover capping system proposed in the HSP report. There are no contaminants at unacceptable levels.

Also to be included in the final verification report will be all the muck away information.

This report and its proposals must be submitted and approved by TDC.

-  Tarmac to roads and pavements and parking bays
-  Paving slabs
-  Artificial grass
-  1.8 x 2.4m shed / bike storage
-  Bark mulched areas and shrub planting
-  Pebbles
-  Raised planting beds with shrubs. Mix of:
Rosa pimpinellifolia (burnet rose)
Ruscus aculeatus (butcher's broom)
Salix herbacea Salix lanata AGM (woolly willow)
-  Existing Trees Retained (including those off site)
-  Existing Trees Removed
-  New Trees
-  New fully mature hornbeam hedge (pre-formed hedge installed in sections) (infragreen arbor-raft installed under road, to allow root growth without compaction)
-  Bin store
-  1m high railings to provide private secure play space to the front of each property (plots 1-8 only)

•OB	C	25.01.23	Updated for landscaping layout
•MB	B	15.11.22	Updated for planning condition to suit client requirements
•OB	A	24.11.21	General Issue
•MB	P2	18.10.21	Position of units 9-11 corrected

APPENDIX 2

CORRESPONDENCE

Thanet District Council

Notification of Grant of Permission to Develop Land
Town and Country Planning Act 1990
Town and Country Planning (Development Management Procedure)
Order 2015

To: Atmosphere Retirement Scheme And Square Circle Developmen...
c/o: Miss Nicola Harvey
Taylor Roberts Ltd
2 Dane John
Watling Street
Canterbury
Kent
CT1 2QU

F/TH/18/1109

TAKE NOTICE that **THANET DISTRICT COUNCIL**, the District Planning Authority under the Town and Country Planning Acts, has **granted permission** for:

PROPOSAL: Change of use from light industrial (use class B2) to residential (use class C3) with erection of 12No. 2 bedroom dwellings, 8no. 2 bedroom maisonettes, and 3No. 1 bedroom dwellings, with associated parking and landscaping, following demolition of existing office building, showroom buildings and manufacturing/storage buildings

LOCATION: 14 Suffolk Avenue, Westgate On Sea, Kent, CT8 8JG,

*In coming to this decision regard has been had to the following policies:
Thanet Local Plan Policies:*

- EC12 Retention of Employment Sites
- H1 Residential Development Sites
- H4 Windfall Sites
- H14 Affordable Housing Negotiations
- H8 Size and Type of Housing
- D1 Design Principles
- TR12 Cycling
- TR16 Car Parking Provision
- SR5 Play Space
- CF2 Development Contributions

The application was processed having regards to the National Planning Policy Framework, which requires that where there are potential solutions to problems arising in relation to dealing with planning applications, the Council will work with applicants in a positive, creative and proactive manner to seek solutions to those problems.

The permission is SUBJECT TO the conditions specified hereunder:

- 1 The development hereby permitted shall be begun before the expiration of three years from the date of this permission.

GROUND:

In accordance with Section 91 of the Town and Country Planning Act 1990 (as amended by Section 51 of the Planning and Purchase Act 2004).

- 2 The proposed development shall be carried out in accordance with the submitted application as amended by the revised drawing numbered 16/19/12 Rev C, received 25th February 2020; the additional plan numbered C10902 Rev B, received 24th February 2020; revised drawings numbered 16/19/09 Rev D and 16/19/02 Rev F, received 2nd January 2020; revised drawings numbered 16/19/03 Rev C, 16/19/06 Rev C, 16/19/07 Rev E, 16/19/08 Rev D, 16/19/10 Rev C, 16/19/11 Rev B, and 16/19/13 Rev B, received 22nd February 2019.

GROUND:

To secure the proper development of the area.

- 3 No development approved by this planning permission shall commence until a strategy to deal with the potential risks associated with any contamination of the site has been submitted to, and approved in writing by, the Local Planning Authority. This strategy will include the following components:

1. A preliminary risk assessment which has identified:

- all previous uses;
 - potential contaminants associated with those uses;
 - a conceptual model of the site indicating sources, pathways and receptors;
- and
- potentially unacceptable risks arising from contamination at the site.

2. A site investigation scheme, based on (1) to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.

3. The results of the site investigation and the detailed risk assessment referred to in (2) and, based on these, an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.

4. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in the remediation strategy in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components require the written consent of the local planning authority. The scheme shall be implemented as approved.

GROUND:

To ensure that the development does not contribute to, or is not put at unacceptable risk from, or adversely affected by, unacceptable levels of water pollution in line with paragraph 170 of the National Planning Policy Framework.

- 4 Prior to any part of the permitted development being occupied a verification report demonstrating the completion of works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to, and approved in writing, by the local

planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met.

GROUND:

To ensure that the site does not pose any further risk to human health or the water environment by demonstrating that the requirements of the approved verification plan have been met and that remediation of the site is complete. This is in line with paragraph 170 of the National Planning Policy Framework.

- 5 If, during development, significant contamination is suspected or found to be present at the site, then works shall cease, and this contamination shall be fully assessed and an appropriate remediation scheme agreed with the Local Planning Authority. The approved works shall be implemented within a timetable agreed by the Local Planning Authority and shall be of such a nature as to render harmless the identified contamination given the proposed end use of the site and surrounding environment, including controlled waters. Prior to first occupation/use and following completion of approved measures, a verification report shall be submitted to the Local Planning Authority for approval.

GROUND:

To ensure that the proposed development will not cause harm to human health or pollution of the environment, in accordance with DEFRA and Environment Agency document Model Procedures for the Management of Land Contamination (Contamination Report 11) and National Planning Policy Framework.

- 6 No infiltration of surface water drainage into the ground is permitted other than with the written consent of the Local Planning Authority. The development shall be carried out in accordance with the approved details.

GROUND:

To ensure that the development does not contribute to, or is not put at unacceptable risk from, or adversely affected by, unacceptable levels of water pollution caused by mobilised contaminants in line with paragraph 170 of the National Planning Policy Framework.

- 7 Piling or any other foundation designs using penetrative methods shall not be permitted other than with the express written consent of the Local Planning Authority, which may be given for those parts of the site where it has been demonstrated by a piling risk assessment that there is no resultant unacceptable risk to groundwater. The development shall be carried out in accordance with the approved details.

GROUND:

To ensure that the development does not contribute to, or is not put at unacceptable risk from, or adversely affected by, unacceptable levels of water pollution caused by mobilised contaminants in line with paragraph 109 of the National Planning Policy Framework.

- 8 No development shall take place (excluding demolition) until details of the means of foul drainage have been submitted to and agreed in writing by the Local Planning Authority. The development shall be carried out in accordance with such details as are agreed and thereafter maintained.

GROUND:

To prevent pollution, in accordance with the advice contained within the National Planning Policy Framework.

- 9 No development (excluding demolition) shall take place until a detailed sustainable surface water drainage scheme for the site has been submitted to (and approved in writing by) the

local planning authority. The detailed drainage scheme shall demonstrate that the surface water generated by this development (for all rainfall durations and intensities up to and including the climate change adjusted critical 100 year storm) can be accommodated and disposed of within the curtilage of the site without increase to flood risk on or off-site.

The drainage scheme shall also demonstrate (with reference to published guidance):

- that silt and pollutants resulting from the site use can be adequately managed to ensure there is no pollution risk to receiving waters.
- appropriate operational, maintenance and access requirements for each drainage feature or SuDS component are adequately considered, including any proposed arrangements for future adoption by any public body or statutory undertaker.

The drainage scheme shall be implemented in accordance with the approved details.

GROUND:

To ensure the development is served by satisfactory arrangements for the disposal of surface water and to ensure that the development does not exacerbate the risk of on/off site flooding, in accordance with the NPPF

- 10 No building on any phase (or within an agreed implementation schedule) of the development hereby permitted shall be occupied until a Verification Report, pertaining to the surface water drainage system and prepared by a suitably competent person, has been submitted to and approved by the Local Planning Authority. The Report shall demonstrate the suitable modelled operation of the drainage system where the system constructed is different to that approved. The Report shall contain information and evidence (including photographs) of details and locations of inlets, outlets and control structures; landscape plans; full as built drawings; information pertinent to the installation of those items identified on the critical drainage assets drawing; and, the submission of an operation and maintenance manual for the sustainable drainage scheme as constructed.

GROUND:

To ensure the development is served by satisfactory arrangements for the disposal of surface water and to ensure that the development does not exacerbate the risk of on/off site flooding, in accordance with the NPPF

- 11 Prior to the commencement of any development on site details to include the following shall be submitted to and approved by the Local Planning Authority and should be carried out in accordance with the approved details.
- (a) Routing of construction and delivery vehicles to / from site
 - (b) Parking and turning areas for construction and delivery vehicles and site personnel
 - (c) Timing of deliveries
 - (d) Provision of wheel washing facilities
 - (e) Temporary traffic management / signage
 - (f) Measures to control noise affecting nearby residents
 - (g) Dust control measures

GROUND:

In the interests of highway safety and neighbouring amenity, in accordance with Policy D1 of the Thanet Local Plan and the National Planning Policy Framework.

- 12 The area shown on the approved plan numbered 16/19/11 Rev B for vehicle parking and manoeuvring areas, shall be kept available for such use at all times and such land and access thereto shall be provided prior to the first occupation of the dwelling hereby permitted.

GROUND:

Development without adequate provision for the parking or turning of vehicles is likely to lead to parking inconvenient to other road users and detrimental to amenity and in pursuance of policy D1 of the Thanet Local Plan.

- 13 Prior to the first use of the site the vehicle loading/unloading and turning facilities shown on the submitted plan numbers 16/19/11 Rev B shall be provided and permanently retained.

GROUND:

In the interests of highway safety.

- 14 Prior to the first occupation of each unit, cycle parking for that unit shall be provided and made available for use. This shall be at a ratio of one per maisonette and one per bedroom for each dwelling. Details of the location and design of the cycle parking shall be submitted to and approved in writing by the Local Planning Authority prior to installation, which shall be in accordance with the approved details.

GROUND:

In the interests of promoting increased cycling in accordance with Policy TR12 of the Thanet Local Plan

- 15 Prior to the first occupation of the development hereby approved, full details of both hard and soft landscape works, to include

- species, size and location of new trees, shrubs, hedges and grassed areas to be planted.
- the treatment proposed for all hard surfaced areas beyond the limits of the highway.
- walls, fences, other means of enclosure proposed, which shall include a new side boundary treatment adjacent to the rear garden of no. 12 Suffolk Avenue, to a minimum height of 2m.

shall be submitted to, and approved in writing by, the Local Planning Authority.

GROUND:

In the interests of the visual amenities of the area, neighbouring privacy, and to adequately integrate the development into the environment in accordance with Policies D1 and D2 of the Thanet Local Plan.

- 16 All hard and soft landscape works shall be carried out in accordance with the approved details. The works shall be carried out prior to the first occupation; of any part of the development, or in accordance with a programme of works to be agreed in writing with the Local Planning Authority. Any trees or plants which within a period of 5 years from the completion of the development die, are removed or become seriously damaged or diseased, shall be replaced in the next planting season with others of a similar size and species.

GROUND:

In the interests of the visual amenities of the area in accordance with Policies D1 and D2 of the Thanet Local Plan

- 17 The development hereby approved shall incorporate a bound surface material for the first 5 metres of the access from the edge of the highway.

GROUND:

In the interests of highway safety.

- 18 Prior to the construction of the external surfaces of the development hereby approved samples of the materials to be used shall be submitted to, and approved in writing by, the Local Planning Authority. Development shall be carried out in accordance with the approved samples.

GROUND:

In the interests of visual amenity in accordance with Policy D1 of the Thanet Local Plan

- 19 Prior to the first occupation of the development hereby permitted, details of the refuse storage location shall be submitted to and approved in writing by the Local Planning Authority. The refuse storage shall be in accordance with the approved details and thereafter maintained.

GROUND:

To secure a satisfactory standard of development and in the interests of the amenities of the area, in accordance with Policy D1 of the Thanet Local Plan.

- 20 Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) (England) Order 2015 (or any Order revoking and re-enacting that Order), no windows or other openings shall be inserted in the northern rear elevation of units 9-11 (adj to no.12 Suffolk Avenue) of the development hereby approved without the prior written permission of the Local Planning Authority.

GROUND:

To safeguard the privacy and amenities currently enjoyed by the occupiers of adjoining residential properties in accordance with Policy D1 of the Thanet Local Plan.

- 21 The first floor side facing windows serving bedroom 2 of units 1-8 of the development hereby permitted shall be obscure glazed and non-opening below a cill height of 1.7m when measured from the internal floor level. The obscured glass shall be of a minimum level of obscurity to conform to Pilkington Glass level 4 or equivalent, and shall be installed prior to first occupation of units 1-8, and permanently retained thereafter.

GROUND:

To safeguard the privacy and amenities currently enjoyed by the occupiers of adjoining residential properties in accordance with Policy D1 of the Thanet Local Plan.

- 22 Prior to the first occupation of the development hereby permitted, electric vehicle charging points shall be provided within the site in the form of one active space per ten unallocated spaces, and one active space per allocated space. Details of the location and design of the electric vehicle charging points shall be submitted to and approved in writing by the Local Planning Authority prior to installation, with the development carried out in accordance with the approved details.

GROUND:

To reduce the impact upon air quality, in accordance with the NPPF.

- 23 At least 10% of the development shall be built in compliance with building regulation part M4(2).

GROUND:

To meet a range of community needs, in accordance with the NPPF and Policy QD05 of the Draft Local Plan.

- 24 No development shall take place (excluding demolition) until a specification outlining the measures to be taken to demonstrate compliance with the submitted sustainability

statement received 5th November 2019, which requires the development to achieve zero carbon in the form of a Home Quality Mark 5* rating or equivalent, has been submitted to and approved in writing by the Local Planning Authority. Development shall be carried out in accordance with the agreed specification, with the identified measures in place and made operational prior to the first occupation of the development.

GROUND:

To achieve sustainable design in accordance with Policy QD01 of the Draft Thanet Local Plan, and for the development to provide sufficient benefits from environmentally high quality homes that would outweigh a lack of financial contribution towards local infrastructure provision, to accord with Policy SP41 of the Draft Thanet Local Plan.

- 25 Prior to the commencement of works hereby permitted (including demolition and site clearance), an Arboricultural Method Statement shall be submitted to, and approved in writing by, the Local Planning Authority. The method statement shall include tree protection fencing locations; a schedule of any tree works required to existing trees; details of the works to be carried out within the root protection areas; and a scheme for auditing tree protection and subsequent reporting of this to the Local Planning Authority. The development shall be carried out in accordance with the approved details and methodology.

GROUND:

To Protect existing trees and to adequately integrate the development into the environment, in accordance with Thanet Local Plan Policies D1 and D2.

INFORMATIVES

- 1 A formal application for connection to the water supply is required in order to service this development. Please contact Southern Water, Sparrowgrove House, Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk.
- 2 A formal application for connection to the public sewerage system is required in order to service this development. Please contact Southern Water, Southern House, Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk.
- 3 For the avoidance of doubt, the provision of contributions to as set out in the unilateral undertaking made on 15th June 2020 submitted with this planning application, and hereby approved, shall be provided in accordance with The Schedule of the aforementioned deed.
- 4 It is the responsibility of developers to have the appropriate waste storage facilities and containers in place prior to the property being occupied. For more information, please contact Waste and Recycling on 01843 577115, or visit our website <http://thanet.gov.uk/your-services/recycling/waste-and-recycling-storage-at-new-developments/new-developments/>
- 5 It is the responsibility of the applicant to ensure, prior to the commencement of the development hereby approved, that all necessary highway approvals and consents where required are obtained and that the limits of highway boundary are clearly established in order to avoid any enforcement action being by the Highway Authority. The applicant must also ensure that the details shown on the approved plans agree in every aspect with those approved under such legislation and common law. It is therefore important for the applicant to contact KCC Highway and Transportation to progress this aspect of the works prior to commencement on site
- 6 Thanet District Council recommends that all developers work with a telecommunication partner or subcontractor in the early stages of planning for any new development to make sure that Next Generation Access Broadband is a fundamental part of the project. Access

to superfast broadband should be thought of as an essential utility for all new homes and businesses and given the same importance as water or power in any development design. Please liaise with a telecom provider to decide the appropriate solution for this development and the availability of the nearest connection point to high speed broadband.

Date: 19 May 2021

Dear Sir/Madam

DISCHARGE OF CONDITIONS 3 AND 4. CHANGE OF USE FROM LIGHT INDUSTRIAL (USE CLASS B2) TO RESIDENTIAL (USE CLASS C3) INCLUDING CONVERSION OF BARREL VAULT BUILDING INTO 8NO. 2 BEDROOM DWELLINGS TOGETHER WITH THE ERECTION OF 12 NO. 2 BEDROOM AND 3NO. 1 BEDROOM DWELLINGS FOLLOWING DEMOLITION OF THE EXISTING OFFICE BUILDING, SHOWROOM BUILDINGS AND WORKSHOP.

14 Suffolk Avenue, Westgate-On-Sea, Kent, CT8 8JG.

Thank you for consulting us on the additional information submitted to support the above application.

We have reviewed the submitted documents and are satisfied that conditions 3 and 4 **can be partially discharged.**

Informative

The recommendations and analysis of risks and liabilities detailed in the submitted site investigation report are agreed in principle based on the sampling to date. The general scope of works at the above site is accepted, as being in line with relevant guidance for the re-development of a contaminated site, However sampling was limited, given the nature of some of the uses of buildings, particularly with regards to spray painting. Therefore once the site is cleared, as well as further geotechnical assessment, it is recommended confirmatory tests should be made of any ground exhibiting discolouration or odours.

Any planning conditions related to verification of contamination works should not be fully discharged until such time as all relevant works are completed and a verification report, detailing all works at the site and any unexpected discoveries, has been submitted. The report should include summaries of all materials removed, details of validation sampling/monitoring carried out in remediation areas, relevant certificates for imported materials and confirmation that the site is fit for the proposed use. Contaminated soil that is (or must be) disposed of is waste.

Therefore, its handling, transport, treatment and disposal are subject to waste management legislation, which includes:

- Duty of Care Regulations 1991
- Hazardous Waste (England and Wales) Regulations 2005
- Environmental Permitting (England and Wales) Regulations 2016
- The Waste (England and Wales) Regulations 2011

Developers should ensure that all contaminated materials are adequately characterised both chemically and physically in line with British Standard BS EN 14899:2005 'Characterization of Waste - Sampling of Waste Materials - Framework for the Preparation and Application of a Sampling Plan' and that the permitting status of any proposed treatment or disposal activity is clear. If in doubt, the we should be contacted for advice at an early stage to avoid any delays.

If the total quantity of hazardous waste material produced or taken off-site is 500kg or greater in any 12 month period, the developer will need to register with us as a hazardous waste producer. Refer to the [hazardous waste](#) pages on gov.uk for more information.

Further clarification should be sought from the LA EHO with respect to issues related to harm to human health

Should you require any additional information, or wish to discuss these matters further, please do not hesitate to contact me via the email below.

Yours faithfully

Mr Adam Harwood
Planning Advisor

Re: 14 Suffolk Avenue Westgate On Sea F/TH/18/1109 (CON/TH/21/0668)

1 message

Morgan Sproates <morgan.sproates@thanet.gov.uk>
To: Marie Brook-Smith <marie.brook-smith@thanet.gov.uk>

21 June 2021 at 13:26

Hi Marie,

Thank you for your email and further to previous correspondence.

I am writing following review of the attached Phase 2 Report (Ref. HSP2021-C3490-G-GPII-117, HSP, April 2021) to confirm that this department concurs with the conclusions of the preliminary report. ie. that the risks to human health, water resources, plants and buildings and services are considered to be low (Table 9).

Condition 3 of F/TH/18/1109 can therefore be discharged in full;

However, it is noted that where Made Ground is left in-situ in proposed residential gardens or areas of soft landscaping, a suitable clean cover system should be provided. In garden areas, this should be of a minimum of 600mm thickness comprising 150mm topsoil and 450mm subsoil and within soft landscaping areas this should be of a minimum of 450mm thickness comprising 150mm topsoil and 300mm subsoil in accordance with BRE: Cover Systems for Land Regeneration document.

Therefore, this department will recommend discharge of Condition 4 of F/TH/18/1109 following receipt of satisfactory verification reports confirming that suitable inert cover in the gardens / landscaped areas has been completed and no further unsuspected contamination was encountered or caused during groundworks.

Kind regards,

Testing is now available for those who don't have symptoms, find out more at thanet.gov.uk/testing

On Thu, 29 Apr 2021 at 08:18, Marie Brook-Smith <marie.brook-smith@thanet.gov.uk> wrote:

Please find attached a report pursuant to conditions 3 and 4 of the above mentioned planning permission.

3) No development approved by this planning permission shall commence until a strategy to deal with the potential risks associated with any contamination of the site has been submitted to, and approved in writing by, the Local Planning Authority. This strategy will include the following components:

1. A preliminary risk assessment which has identified:

- all previous uses;
 - potential contaminants associated with those uses;
 - a conceptual model of the site indicating sources, pathways and receptors;
- and
- potentially unacceptable risks arising from contamination at the site.

2. A site investigation scheme, based on (1) to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.

3. The results of the site investigation and the detailed risk assessment referred to in (2) and, based on these, an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.

4. A verification plan providing details of the data that will be collected in order to demonstrate that the works set

out in the remediation strategy in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components require the written consent of the local planning authority. The scheme shall be implemented as approved.

GROUND:

To ensure that the development does not contribute to, or is not put at unacceptable risk from, or adversely affected by, unacceptable levels of water pollution in line with paragraph 170 of the National Planning Policy Framework.

4) Prior to any part of the permitted development being occupied a verification report demonstrating the completion of works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to, and approved in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met.

GROUND:

To ensure that the site does not pose any further risk to human health or the water environment by demonstrating that the requirements of the approved verification plan have been met and that remediation of the site is complete. This is in line with paragraph 170 of the National Planning Policy Framework.

Would you please provide comments on this information.

Mr Graham Ross
16 Suffolk Avenue
Westgate On Sea
Kent
CT8 8JG

Dear Mr Graham Ross

TOWN AND COUNTRY PLANNING ACT 1990

PROPOSAL: Application for approval of conditions 3 (Contamination) and 4 (Verification Report - Contamination) of planning permission F/TH/18/1109 for the change of use from light industrial (use class B2) to residential (use class C3) with erection of 12No. 2 bedroom dwellings, 8no. 2 bedroom maisonettes, and 3No. 1 bedroom dwellings, with associated parking and landscaping, following demolition of existing office building, showroom buildings and manufacturing/storage buildings

LOCATION: 14 Suffolk Avenue, Westgate On Sea, Kent, CT8 8JG,

The Thanet District Council, as District Planning Authority, has now considered details submitted pursuant to conditions attached to the above mentioned planning consent.

I would confirm that the following conditions attached to planning consent reference number F/TH/18/1109 have now been part approved:

Condition No's –

Condition 3 (Contamination)

Details in the Phase 2 Geo-Environmental Assessment Report (dated April 2021) are considered acceptable to partially approve condition 3, to allow for site clearance to enable further geotechnical assessment to take place. Please refer to the Environment Agency's comments dated 19th Mat 2021 for further information.

Condition 4 (Verification Report)

This condition is partially approved to allow commencement on site. A full Verification Report should be submitted once all relevant works have been completed. This report should detail all works and any unexpected discoveries. Please refer to the Environment Agency and Thanet Council Environmental Health Department comments for more information.

Thanet District Council
PO Box 9
Cecil Street
Margate
Kent CT9 1XZ

01843 577000
www.thanet.gov.uk

The following conditions require the submission of details. Some of these conditions need to be approved prior to commencement on site. For full condition wording please refer to the decision notice.

- 8 (Foul Drainage)
- 9 (Surface Water Drainage)
- 10 (Verification Report - Surface Water Drainage)
- 11 (Construction Management Plan)
- 14 (Cycle Parking)
- 15 (Landscaping)
- 18 (Materials)
- 19 (Refuse)
- 22 (Electric Vehicle Charging Points)
- 25 (Arboricultural Statement)

You should also refer to the decision notice for all conditions that do not require the submission of details but remain in force.

Yours sincerely

Subject: Re: Con/TH/21/0668 Contamination condition

Morning

Thank you for your email.

You can submit for each phase, you will need to confirm within any submitted application, which units the application relates to.

Kind regards
Diane

On Tue, 1 Aug 2023 at 15:15, <graham@squarecircleddevelopments.com> wrote:

Good afternoon Diane,

Re; Our site at Suffolk Avenue, Westgate on Sea.

I am following up on the partial approval of Condition 3. Relating to contamination. We are getting close to completion of the first 12 units of our project at Suffolk Avenue, Westgate on Sea.

We had a conversation some months ago relating to discharge of this condition for this phase of the development. The Geo technical survey showed no issues in this area and the WAC tests for waste removal have also provided clean readings. Can we do a verification report on this half of the site so we can commence selling these units. Or how can we best proceed? The rest of the site has not yet been exposed to the extent we can get any more information than produced in the geo technical survey. We intend to get this part re assessed once stripping back of the concrete slabs has taken place at the commencement of the next phase.

Kind regards

Graham
