

Front Elevation - south

Notes  
 Not for construction.  
 Rev A.  
 Low profile PV Panels added to west roof slopes

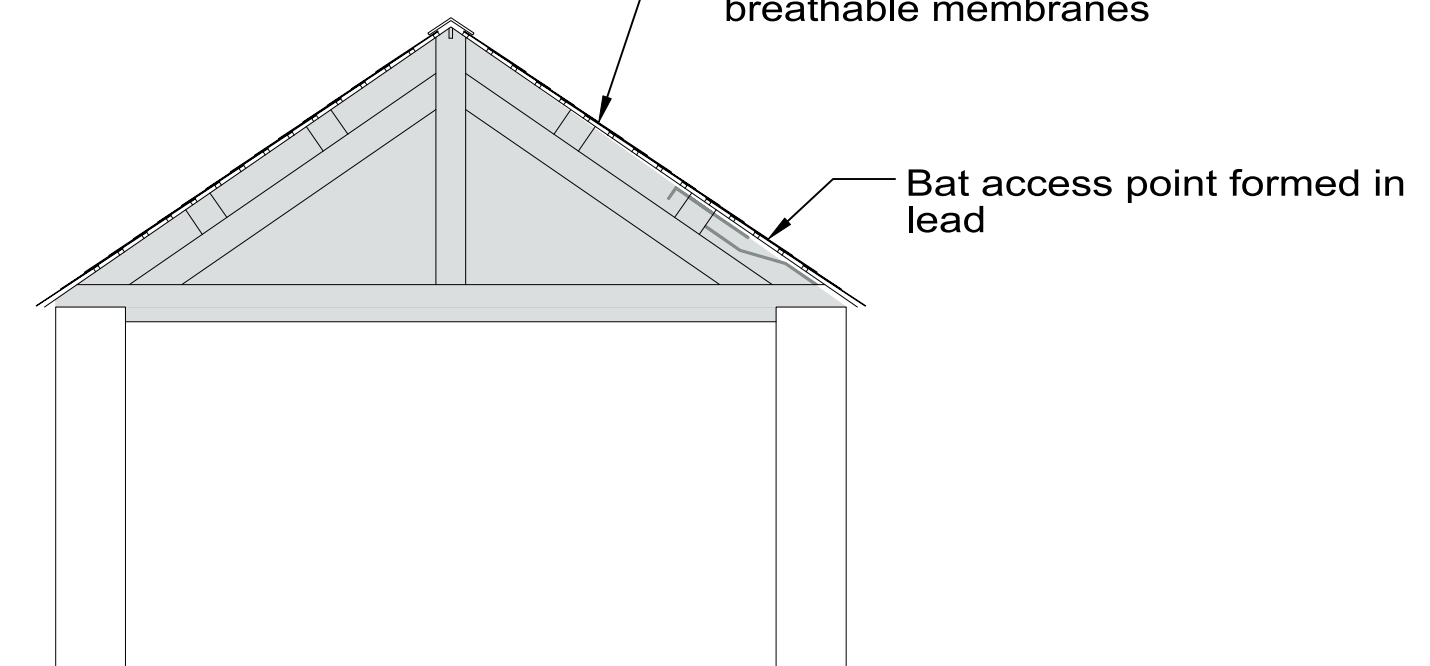

Side elevation - north

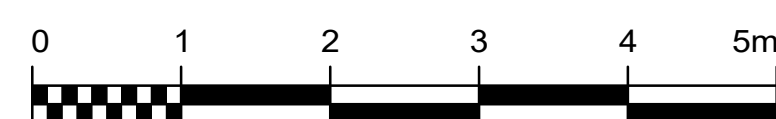

Side elevation-south

Shaded area indicates bat loft  
 6.8m x 4.2m x 2.0m high to  
 create approx volume of 28.5 m3

Type 1F bitumen hessian felt (BS747) will be used as lining beneath the slates, so bats cannot come into contact with non-bitumastic modern breathable membranes
