

# FULLY GROWN SEDUM ROOF PACK (SSSP)

## Technical Data Sheet

Fully grown sedum roof pack to include, 20mm roof drainage system, 40mm pre blended engineered growing medium, and a fully grown sedum carpet roll.

## SATURATED ROOF WEIGHT

Minimum roof fall  
1: 120 58.3Kg m<sup>2</sup> -  
63.4kg m<sup>2</sup>

### BENEFITS FOR THE BUILDING OWNER

- Expand roof life 2x3 times (up to 60 years)
- Reduce air-conditioning costs & heating costs
- Stormwater management tool
- Upto 15 LEED credits
- Government and municipality incentives
- Improve public relations
- Transform dead space into garden space

### ACCOMPANYING DOCUMENTS

SSRD20, SSMC1, SSFGSC

This information is accurate to the best of our knowledge. We operate an ongoing policy of research and development and reserve the right to alter any specification without notice. We will not accept any liability that may arise out of misuse of either the information or the product

### BENEFITS FOR THE COMMUNITY

- Reduce stormwater runoff
- Reduce city 'heat island' effect
- Reduce smog and improve air quality
- Reduce noise
- Reduce energy demand
- Improve aesthetics
- Provide green space

### BENEFITS FOR THE ENVIRONMENT

- Prevent combined sewer overflow
- Reduce carbon monoxide effect
- Remove nitrogen pollution from rain
- Neutralise acid rain effect
- Provide habitat for wildlife

# SSSRD20

## RIDGED ROOF DRAIN

makes extensive use of recycled polymers in its construction

## DESCRIPTION

*Consists of a perforated cusped recycled HDPE (High Density Polyethylene) core with selected geotextiles thermally bonded on each side. It is primarily intended for use under thin soil layers where the plant roots can reach down to the water in the core reservoirs. The core is perforated to allow the excess rainwater to flow into the underside and away through the roofdrain to the outlets. The upper textile is optimised for drainage performance and the lower textile protects the waterproofing system. Its major application is in extensive roof garden drainage where the SSSRD20 roofdrain provides a lightweight drainage layer and water reservoir to sustain plant growth.*

## FEATURES

**Roll size:** 920mm x 50m  
(coverage per roll 46m<sup>2</sup>)

**Depth Total:**  
24mm (20mm inner core)

**Material:** Polypropylene  
mixed PP & Other Recycled  
Polymers

**Water Storage:** 5.5 l/m<sup>2</sup>

**Saturated Weight:**  
7.5 kg/m<sup>2</sup>

**Dry Weight:** 1.720 kg/m<sup>2</sup>

**Tensile Strength:**  
24 / 22 kN/m

## BENEFITS

- > Drainage
- > Water Attenuation  
5.5 ltrs m<sup>2</sup>
- > Protection of  
Waterproofing Membrane
- > Filtration
- > Separation
- > Easy to install

This information is accurate to the best of our knowledge. We operate an ongoing policy of research and development and reserve the right to alter any specification without notice. We will not accept any liability that may arise out of misuse of either the information or the product

# SSMC1 GROWING MEDIUM

A superior blend of lightweight water retaining aggregates, and composted organic material.

## DESCRIPTION

*A superior blend of lightweight water retaining aggregates, and composted organic material, specifically researched and engineered to offer a unique self-sustaining growing platform. Only the highest quality materials are used in our MC1 product, utilising composted organic material from sustainable sources, recycled clean crushed brick which is a second from the brick manufacturing industry containing no demolition waste. In addition a carefully selected blend of lightweight aggregate and pumice is added which offers a low density and high moisture absorption, which is lacking in lower quality substrates.*

## FEATURES

**Loose Bulk Density:**

800 – 900 Kg/m<sup>3</sup>

**Dry Weight Approx.** 900 kg

**Saturated Weight:**

Approx. 1200 kg

**pH Value:** 6.5 – 7.5

**Available in:**

Plastic sacks on pallets

Bulk bags

Loose bulk

Silo tanker

---

## BENEFITS

Our MC1 offers a well-drained anti-settlement composition and with the additional water absorbent materials used creates a perfect environment for our Sedum Turf layer and for all drought tolerant plant species.

This information is accurate to the best of our knowledge. We operate an ongoing policy of research and development and reserve the right to alter any specification without notice. We will not accept any liability that may arise out of misuse of either the information or the product

# SSFGSC FULLY GROWN SEDUM CARPET

A pre blended sedum turf roll consisting of an excellent selection of Sedum varieties

## FEATURES

### **Roll size:**

1m x 1m or 1m x 1.2m  
(coverage per roll 1m<sup>2</sup> or 1.2m<sup>2</sup>)

### **Depth:**

Variable 25 - 45mm

### **Material:**

Reinforced Mesh Backing or  
Coco Matting with Clean  
Organic Compost

### **Dry Weight:**

12.5 kg/m<sup>2</sup>

### **Saturated:**

Weight 14.7 kg/m<sup>2</sup>

## DESCRIPTION

*A pre blended sedum turf roll consisting of an excellent selection of Sedum varieties with coverage of no less than 85%. The sedum turf is grown from randomly scattered seedlings therefore we cannot guarantee every variety in each m<sup>2</sup> however larger order quantities should see all varieties present.*

## BENEFITS

- > Lightweight
- > Low growing
- > Drought tolerant
- > Minimum maintenance

This information is accurate to the best of our knowledge. We operate an ongoing policy of research and development and reserve the right to alter any specification without notice. We will not accept any liability that may arise out of misuse of either the information or the product

# SEDUM VARIETIES

 Sedum Pallidum	 Sedum Hispanicum	 Sedum Album 'balticum'	 Sedum Album 'brevifolium'
 Sedum Album 'rhodopaeum'	 Sedum Coral Carpet	 Sedum Album 'murale'	 Sedum Album
 Sedum Acre 'aureum'	 Sedum Lydium	 Sedum Spurium	 Sedum Reflexum 'blue cushion'
 Sedum Oreganum	 Sedum Spathulifolium 'purpureum'	 Sedum Reflexum 'yellow cushion'	 Sedum Weihenstephaner Gold
 Sedum Spureum 'voodoo'	 Sedum Reflexum 'blue spruce'	 Sedum Reflexum Gold	 Sedum Kamtschaticum

Our sedum is randomly seeded from cuttings. We cannot guarantee all varieties are present in your order however you should see at least 6 random varieties per square meter.

More varieties will be present in larger orders.

# SEDUM SUPPLY AFTERCARE LIVING ROOF GUIDE

## Sedum Roofs

Unit MO20  
Mile Oak Industrial Estate,  
Oswestry,  
SY10 8GA

When choosing Sedum Supply extensive living roof systems and products, rest assured you are getting the best product available in the UK marketplace and we will make every effort to support your project from start to finish, including aftercare.

We are often asked the question “how do I look after the roof and what do I need to do?” Put simply just like an easy-care garden at home, we say low maintenance but not no maintenance, therefore a little aftercare will help your roof to flourish for many years to come.

There is a common misconception that sedum green roofs will look green and sedum plants are always green. This is not the case, they consist mainly of low growing, drought tolerant sedum plants of many varieties that change colour and appearance with the seasons. There are 8 – 10 different varieties within the sedum carpet some very similar in appearance to others. Not all varieties will survive in certain locations around the country for many reasons, but because of the vast variety the stronger and better suited plants will take over to ensure consistency across the roof area.

As time passes it's not uncommon for weed and moss to make an appearance in the sedum but due to the nature of design, creating a free draining and predominantly dry environment will assist the sedum to thrive and discourage the unwanted vegetation.

In terms of maintenance requirements going forward, a simply yearly weed, feed and replenish is all it takes and this should be done at least once a year to ensure the roof stays in good condition. Obviously the longer this is left then the more work will be required to get the roof back to a more manageable state.

For any further advice please call our office or email us anytime.
