**This Message originated outside your organization.**

---

please find attached

a design access and heritage statement

A proposed floor plan at 1:100 scale to show the whole of the ground floor. The plan at 1:50 is much better to show the details of the extension and the annotation to say the rest of the hall remains as existing is perfectly understandable, and so providing a smaller scale drawing is rather pointless and aids nothing.

The location plan with a scale bar. A scale of 1:1250 is not a mandatory requirement. The national and local validation says 'typically' and then states what the location plan must show and the current plan provided contains all the necessary information.

Kind Regards

Sara
