The driveway near the entrance that was a large tree with low branches, some dead small trees and mature shrubs. The trees have been identified on the attached plan with "T" numbers and the shrubs are within the area marked in red. The proposal would be to prune the mature tree and remove the other trees and shrubs to 'open' up the area. Ground Control will provide a team to carry out the following works. 1) T1 - Holme Oak - With the use of a pole saw crown lift the Oak to 3.5m above the ground level. T2, 3 and 4 - Dead trees - With a chainsaw fell to ground level. Team will also remove the fallen limb.
