

Temporary Ground Protection Specification

To be installed prior to any on site activity (demolition or construction)

- Retain existing on site hard standing if present for as long as possible.
- If indicated new temporary ground protection should be installed as part of the tree protection measures prior to work starting on site.
- For exposed unmade ground within Root Protection Area.
- To be laid on non-permeable membrane
- We recommend 3m x 3m x 20mm plastic manufactured from recycled HDPE plastic, with carrying handles and an engraved grid pattern with minimum 150mm overlap to join together.

To cover all exposed unmade ground for tree Root Protection Area outside of Tree Protective Fencing

Tree Survey Drawing Key

See Tamla Trees, Tree Survey for Individual Tree Details

KEY

Please refer to Tamla Trees report for details

- Category A - Trees of high quality
- Category B - moderate quality
- Category C - low quality
- Category U - Dead, Dying or Defect trees with <10 years retention value

- RPA - root protection area as defined by Table 2 BS 5837:2012
- TP.F — Location of protective fencing - BS 5837 Feet Fence (or similar)
- ▨ Temporary ground protection
- ▨ Existing parking/ driveway
- ▨ Unmade Vehicle Access Track
- Moled Gas Pipe connection
- Temporary mole excavation chamber

NOTE # Tree positions indicatively mapped due to lack of detailed topographical plan
