Description of Proposed Works

Please describe the proposed works

Timber frame and cedar cladding to cover a paddling pool for aesthetic purposes. Timber steps to enter and exit pool only. Formation of flat clad section to encompass dimension's of the paddling pool (paddling pool "bellies out" at the bottom so the base is wider than the top, which creates the need for a clad top section). The flat clad sections are not suitable to be walked on and are therefore not considered decking, as they are not designed to take the weight of pedestrian traffic and the cladding is not suitable material to be walked on. Further, fixed lightweight barriers will be permanently attached to the complete perimeter of the paddling pool cladding, and the entry/exit steps, to ensure that the top section cannot be walked on, and that the steps are limited to entry and exit only. The fixed lightweight barriers will be provided in the form of permanently attached planters with artificial foliage to ensure permanence of installation.

Biodiversity net gain

Householder developments are currently exempt from biodiversity net gain requirements.

However, this exemption still needs to be confirmed by the applicant or agent when making a householder planning permission application.

I/we confirm that the proposed development, if granted permission, would be exempt from the general biodiversity gain condition.

Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended) sets out that every planning permission granted for the development of land in England shall be deemed to have been granted subject to the 'general biodiversity gain condition'.

However, the 'general biodiversity gain condition' does not apply in relation to planning permission for a development which is the subject of a householder application, within the meaning of Article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended).
