

Ref : 23/02064/LBC.

Please submit a more detailed Heritage Statement to include the following:

- acknowledge the previous LBC application and that the current guttering was deemed unacceptable
- provide details of guttering to other buildings in the terrace and why the current guttering has been chosen as a replacement.
  - The building to the right (as facing 10 Water End) has PVC guttering and metal fixings. The current guttering on 10 Water End mimics this as it is PVC with metal fixings however application 23/02064/LBC rejected this material.
  - The building to the left (as facing 10 Water End) has wooden guttering and hangs on gutter blocks.
  - The proposed gutter has been chosen to mimic the building to the right providing seamless connection.
- details of the proposed guttering (profile/shape, materials, colouring, how it will be fixed etc)
  - The proposed guttering will hang onto existing gutter blocks and safely attached with hidden stainless steel screws.

Supplier - George Hill [www.georgehill-timber.co.uk](http://www.georgehill-timber.co.uk)

**Key Features**

- 75 x 140
- ACQ treated
- Authentic Look
- 10 -15 year life expectancy with maintenance

### Product specification

Width	140mm
Depth	75mm
Finished size	63 x 121mm
Finish	Planed
Treatment	ACQ Class 4

2. Please provide manufacturers details/clearer drawing of the proposed guttering.  
As shown above

3. Please provide a large scale elevation drawing showing profile of guttering and fixings etc in relation to the existing building. It may be helpful to enlist the help of a professional technician to provide this information.
