

## Introduction

Welcome to the online fee calculator. The fee calculator can assist you in working out the cost of your planning application.

The fee calculator is a 'standalone' tool and does not have to be used in conjunction with any other part of Scottish Planning Online. It will take you through a series of questions from which data is compiled to calculate the total cost of the application ranging from a simple householder development to large scale schemes such as housing schemes or industrial estates.

Whilst every effort will be taken to ensure that the fee has been calculated correctly, the resulting fee may not be exact and should be treated as an approximation. The determination of whether the fee is correct is solely the responsibility of the relevant local planning authority and you may wish to check with your planning authority that the fee is correct before submitting an application.

Please note that the calculation of the fees is based on the Town and Country Planning (Fees for Application and Deemed Applications)(Scotland) Amendment Regulations 2013.
