Hi Emma

I need more detail than "a little lateral pruning". The description I usually send is below, essentially, how far away from the house will the end of the pruned branches be please?

Selective Crown Reduction - The location of that part of the crown should be described and the amount of the reduction proposed should be stated in terms of the intended remaining length of the limb/branch after pruning or by the proposed distance between any structure and the end of the pruned branch.

Kind regards  
Sue

Hi

We would like to lift the pine tree canopy to about 4.8m and do a little Lateral pruning to keep it away from the house.

Neighbours tree canopy lift to 4.5m and also Lateral pruning where it is touching the house.

Thanks  
Emma

Dear Emma

Thank you for your email but I wonder if you could just clarify a couple of questions please?

<image001.png>

Is the picture in the Arboricultural Assessment (Fig 1: Proposed pruning to top branch of pine tree #02) how you intend to prune the pine?

The application asks to "trim and reduce height above ground level to provide sufficient clearance to new property." If you are just raising the canopy could you tell me by how much please?

Kind regards  
Sue

Hi

Apologies this is late

I needed to discuss with the builder and tree man

We are not changing heights

The pine will remain same height. We are removing the branch that is oddly growing sideways and raising the canopy. Height approx 11m

The second tree is just raising canopy. No height removed. Height approx 12m

I hope this helps

Thanks

Emma
