

Reasons for work Statement

6 Bracken Close Chorley - 25% crown reduction to trees under a TPO

This document is to support the application for Tree works: Trees in conservation areas/subject to TPOs.

During recent high winds, the trees which are subject to this application have become unsafe with large branches falling from the trees and landing on the roof of the house at the address and the driveway which are situated below the trees. This has resulted in branches and roof tiles, which have been damaged and dislodged by falling branches, landing on and around vehicles below the trees.

To prevent serious damage or injury caused by falling branches, this application proposes to reduce the size of the crown of the trees, removing any dead and brittle branches. The proposed works will be undertaken by a Tree Surgeon.
