**REVISION 1 DATED 26TH MARCH 2024**

PRE-PLANNING APPLICATION ADVICE - RESPONSE FROM PLANNING

Application Reference: IW24/130969

**Please note:** There are limits to the pre-application advice that can be given by officers. The pre-application advice service is not a passport to getting permission for unsuitable planning proposals. The final decision on planning applications is made by council members or senior officers. It can only be taken once a formal planning application has been received and consultations have been carried out with adjoining occupiers, those bodies which the council has a statutory requirement to consult and other interested parties. You should therefore be aware the council's officers are unable to give any guarantees about the decision that will be made on an application.

The pre-application advice provided is based on the information that you submitted. Formal planning permission will be the subject of publicity and consultation in accordance with the council's procedures. These and other matters which may subsequently come to light could result in additional issues being raised that are relevant to the outcome of the application.

Description of the Proposal

i) Existing dwelling. Replace existing concrete roof tiles with standing seam metal roof. Replace existing horizontal cedar boarding with new vertical cedar boarding (including improved insulation etc.). Install new flue through existing roof to serve eco wood burner. Replace (like for like) existing sliding patio doors with new composite aluminium/timber system. New decking to area in front of property. Convert existing garage to external bit stone/wa / dog shower / utility and store. To be clad as per main dwelling. \*New conservatory (see plans for details). \* 6 and 7 will require replacement and extension of existing slab and flat roof structure inc. upgrades to insulation to slab/roof and walls etc.) New garage and workshop area / studio and home gym. New outbuilding with pitched roof to match main dwelling above (see plans for details) ii) Gardens To be upgraded generally and creation of parking/turning area between existing dwelling and proposed outbuilding.

Pre-Application Advice (Please note the amount of advice will likely relate to the scale of the proposal)

Planning Officer's name: Lewis, Alexandra

Relevant Constraints:

None

Response

The pre-application enquiry relates to a number of different elements which will be discussed separately below. I have viewed the original planning permission for the construction of the dwelling which included two conditions which removed PD rights (I have copied these conditions below). However, condition 2 was a condition that was included on all permissions of the time and as such as a local authority we do not pursue this condition.

Re-cladding of the property

This element of the proposal would require planning permission as it is considered changing the external finish would materially alter the appearance of the property. However, materials were briefly discussed on site, and it is understood that the applicant would propose a quality timber product that would be allowed to weather naturally which when taking into consideration the appearance of the existing painted cladding officers do not foresee any significant concerns should an application be submitted to replacement of the cladding.

Single storey rear extension/replacement

Whilst this element could be constructed (subject to staying within the allowances) under Class A – enlargement, improvement or alteration of the GPDO, conditions as set out within A.3 of this legislation require that the materials used in any exterior work (other than materials used in the construction of a conservatory (which may be relevant depending on the construction)) shall be of a similar appearance to those used in the construction of the exterior of the

Planning Application for changes to external wall and roof materials and application for Lawful Development Certificate for further development under Permitted Development Rules at :

Cedar Lodge,  
Bedbury Lane,  
Freshwater,  
Isle of Wight  
PO40 9PD

For Mr R. Graham and Miss Clare Hobbs.

existing dwellinghouse. As such as it currently stands the extension would need to be clad in materials to match the existing house, therefore, to clad it in new cladding this would obviously need to wait until permission is granted for the replacement cladding. As such the LPA would recommend that the extension is included within the householder application you would potentially be submitting to replace the cladding.

**Raised decking between property and Bedbury Lane**

Given that the proposed decking would be located forward of the principal elevation facing the highway, raised decking could not be installed under permitted development rights and would therefore require planning permission. Without plans detailing the decking and any balustrade I have been unable to confirm if this element would be considered acceptable with the impact assessed during the officer site visit undertaken once an application has been submitted. Again, this could be included within the application for the cladding and the rear extension.

**Outbuilding**

Prior to the advice in regard to this element of the proposal I draw your attention to condition 1 of the original permission as set out below which would restrict its location within the site, however based on the plans and our onsite discussion it is understood this would be constructed to the rear of the dwellinghouse.

An outbuilding can be constructed using permitted development rights under Class E – *buildings etc. incidental to the enjoyment of the dwellinghouse of the GPDO*. As such provided the development meets the following criteria it could be constructed without the requirement of planning permission, you should therefore satisfy yourself that it does in fact meet the requirements. However, you may wish to submit a separate Lawful Development Certificate application (in addition to the planning application as discussed above) for this development which as discussed would provide you with a formal legal document which can be provided in the future as and when the property is sold.

**Permitted development**

E. The provision within the curtilage of the dwellinghouse of—

- (a) any building or enclosure, swimming or other pool required for a purpose incidental to the enjoyment of the dwellinghouse as such, or the maintenance, improvement or other alteration of such a building or enclosure; or
- (b) a container used for domestic heating purposes for the storage of oil or liquid petroleum gas.

**Development not permitted**

E.1 Development is not permitted by Class E if—

- (a) permission to use the dwellinghouse as a dwellinghouse has been granted only by virtue of Class G, M, MA, N, P, PA or Q of Part 3 of this Schedule (changes of use);
- (b) the total area of ground covered by buildings, enclosures and containers within the curtilage (other than the original dwellinghouse) would exceed 50% of the total area of the curtilage (excluding the ground area of the original dwellinghouse);
- (c) any part of the building, enclosure, pool or container would be situated on land forward of a wall forming the principal elevation of the original dwellinghouse;
- (d) the building would have more than a single storey;
- (e) the height of the building, enclosure or container would exceed—
  - (i) 4 metres in the case of a building with a dual-pitched roof,
  - (ii) 2.5 metres in the case of a building, enclosure or container within 2 metres of the boundary of the curtilage of the dwellinghouse, or
  - (iii) 3 metres in any other case;
- (f) the height of the eaves of the building would exceed 2.5 metres;
- (g) the building, enclosure, pool or container would be situated within the curtilage of a listed building;
- (h) it would include the construction or provision of a verandah, balcony or raised platform;
- (i) it relates to a dwelling or a microwave antenna;
- (j) the capacity of the container would exceed 3,500 litres or
- (k) the dwellinghouse is built under Part 20 of this Schedule (construction of new dwellinghouses).

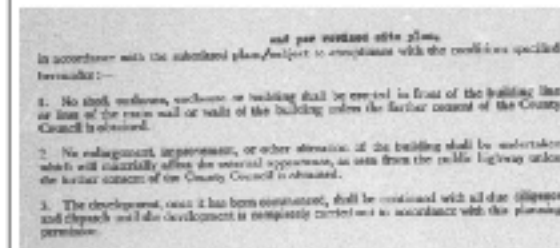

**Impact on neighbouring properties/uses**

When considering the proposed garage/outbuilding the LPA would advise that thought is given to the height of the building to ensure it would not appear over imposing or over dominant. It is also advised that any windows which could potentially overlook private amenity spaces are kept to a minimum and where required they should be obscure glazed. Officers do not consider the alterations and improvements to the main dwellinghouse would cause harm to the occupants of neighbouring properties.

**Highway considerations:**

Should the proposal alter the vehicular access to the site then it is recommended that you seek pre-application advice from Island Roads as they would be consulted during the course of any planning application.

**Other matters**

**Documentation or information requirements:**

Please note this list may not be exhaustive and during validation or the course of the application further details may be requested.

- Relevant application forms and fees
- Location plan
- Block plan
- Existing and proposed elevations
- Existing and proposed floor plans
- Roof plan
