Figure 1 – Location and scale of work that needs to be carried out

Scale 1:500

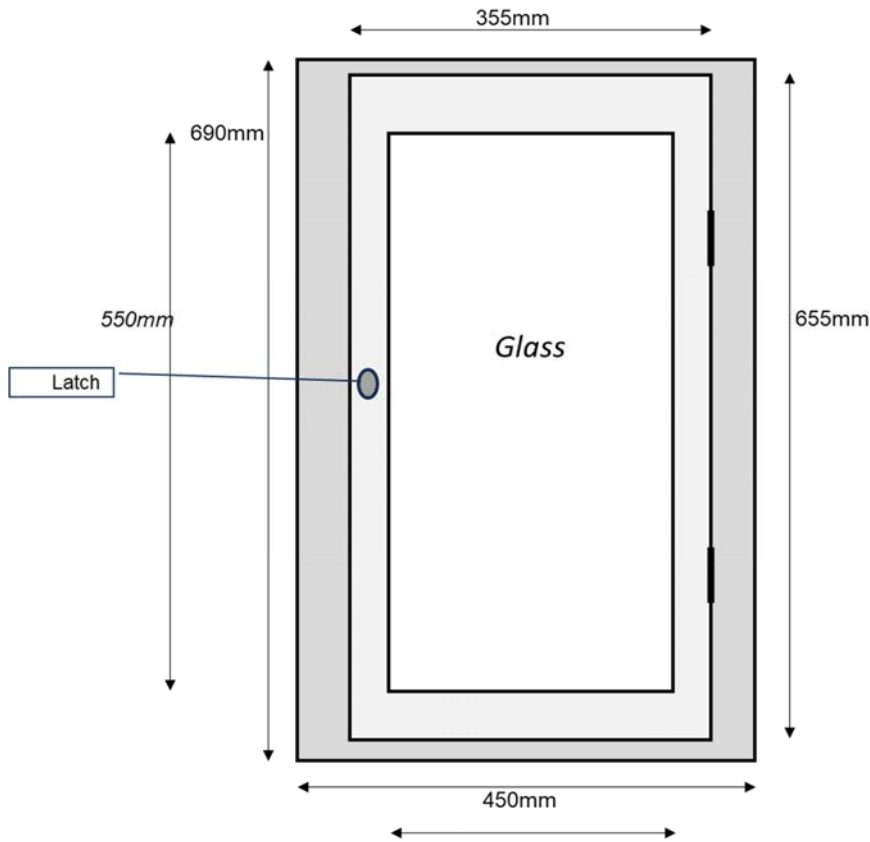

Photo 15 - Part 4 of the Work showing the position of the gable and the window.

Photo 16 – Part 4 of the Work showing the condition of the gable.

Figure 2 - Diagram of window to be replaced

These measurements are taken from the inside due to the physical difficulty of taking measurements from the outside until the scaffolding is erected. The window needs to be replaced.

There is no brochure as the window will be custom made by a joiner.

The current window is painted white. It is proposed to replace the current window with like-for-like. The replacement window will be a casement type made of hard wood (Sapele). The new window will be painted white inside and out.
