

The design is to bring a Nail Lounge to Saffron Walden where the local people of the town and surrounding areas can come to have their nails pampered in an friendly environment.

The design and aesthetics will be accordance with the surrounding units and area.

We hope to drive more commercial traffic towards the town centre which would potentially help all the local businesses grow.

The location of the unit has great visibility and accessibility. There are many car parks and buses to cater for those who drive as well as those who do not.

As the unit is on a commercial street, it is easily accessible to the general public and the unit is already wheelchair friendly.

There is plenty of space inside the unit to accommodate the shop fittings and patrons for everyone in the unit to feel comfortable at all times.
