

Surface Water Drainage Note

Condition 14

The surface water drainage strategy was approved as part of the flood risk assessment and conditioned that it was implemented in accordance with the strategy in Condition 13.

However, Condition 14 again requestes the submission of a surface water strategy.

This has been submitted in the form of the Flood Risk Assessment that was approved as part of the application and section 6 which relates to the surface water drainage strategy approved as part of the planning approval.
