

STATEMENT FOR LOW CARBON CHECKLIST

Energy and Climate Change

A local contractor will be used to undertake the minor works thus negating the need for long travel distances during construction.

Materials

The proposed access and car parking area will use a recycled high density polyethylene grass reinforcement mesh.

SUDS

Not applicable - surface water will naturally percolate into the ground.

Waste

Not applicable.

Travel and Transport

The applicant's reside at 46-50 High Street, Pittenweem and Fife Council has recently painted double yellow lines along the south side of High Street thus reducing the availability of on-street parking. The proposals therefore seek to address this by providing the applicant with off-street parking.

Air Quality

Not applicable - the application site is less than 0.5 ha.

District Heating

Not applicable - as this is an engineering operation.
