The exploratory proposal is to remove a 7 trees growing within the gravelled car park. The would allow for further expansion of a restricted site. The owners are willing to replant more trees of a suitable size & species elsewhere on the hospital grounds. Historically in this area trees have been lost to honey fungus, which is likley to still be present. At the time the whole area was treated using an air spade, and improved surface protection, which does seem to have stopped more trees failing. With the pressures for space at the hospital this application is made asked to be approved.
