February 2024

Dear Mr Porter,

I visited the site to do this tree report and there were no trees on the proposed site apart from the conifer hedge as shown on the enclosed plan.

The owner did say they were some old apple trees which were removed some time ago as they were non productive.

On the land outside the proposed site there are various trees which are far enough away, including the root area, as not to impede with any work.

Yours Sincerely,

Robert Lawrence, LTS
