One wildlife pond will be created within a residential garden at Pondok, Wrabness Road, Ramsey. The purpose of the pond is to provide new aquatic habitat for great crested newts (a European Protected Species). The pond is located within an area strategically targeted for the conservation of great crested newts by Natural England, and will be designed and built to meet the species' specific needs. The pond will have a maximum central depth of 1.3 metres, so as to maintain a stable water temperature during the winter months, and to retain sufficient water during the summer months. The pond will have very gently-sloping bank gradients (at least 1:10) to facilitate safe access to the water by newts and other wildlife, and to create a large drawdown zone (encouraging the germination of aquatic and marginal plants). The pond will have an irregular shape to maximise the bank habitat available to wildlife, and to create a natural-looking pond in the landscape. The pond will be dug into an area with existing clay soil and naturally high groundwater levels, so no materials will be brought onto site, and no artificial liners will be used. All of the soil resulting from the excavations will remain on site; the majority of soil will be spread very thinly on speciespoor semi-improved grassland surrounding the pond and left to naturally regenerate into rough, tussocky grassland. The remaining soil will be used to create a terrestrial habitat bank to provide additional habitat for amphibians, invertebrates, and reptiles. For construction and maintenance purposes the site will be accessed by vehicles via an existing residential driveway which adjoins the public highway (Wrabness Road) at approximately TM 19653 31098. Vehicles will then travel approximately 150m north using an existing hardcore access track, before travelling across species-poor semi-improved grassland for the remainder of the journey (approximately 14m). There are no Rights of Way across or immediately adjacent to the application site, and no new access (vehicular or pedestrian) will be created. No existing areas of priority habitat will be destroyed or disturbed: the pond will be dug into species-poor semi-improved grassland (not classed as a priority wildlife habitat). No trees or hedges will be affected by the work. No nationally or internationally designated sites will be disturbed or adversely affected by the works, nor will the work affect any existing watercourses. The pond will be situated in flood zone 1 (least at risk of flooding). The pond location (grid reference) and dimensions will be as follows: TM 19597 31265; 230 square metres (sqm) surface area; 1.3m maximum central depth. Has the work or change of use already started? Yes ✓ No **Existing Use** Residential garden.

# Please describe the current use of the site Residential garden. Is the site currently vacant? Yes No Does the proposal involve any of the following? If Yes, you will need to submit an appropriate contamination assessment with your application. Land which is known to be contaminated Yes No Land where contamination is suspected for all or part of the site Yes No A proposed use that would be particularly vulnerable to the presence of contamination
