## **1 SITE WASTE MANAGEMENT PLAN**

- 1.1 During construction every effort would be made to source materials locally and conserve the consumption of water. Where possible, any waste materials generated by the construction would be recycled off site to reduce trade waste.
- 1.2 The appointed Principal Contractor will implement on site a scheme which has in mind considerations for anticipated low waste, and to design out unnecessary complications. Constant monitoring will ensure the continual pursuit of wastage reduction is an underlying policy commitment throughout the build.
- 1.3 Bin stores are proposed for future residents.
