ST ANDREW'S CHURCH BISHOPSTONE:

PLANNING APPLICATION FOR WEST EXTENSION TO NORTH AISLE
TO PROVIDE ACCESSIBLE WC AND VESTRY

LIGHTING ASSESSMENT

The proposed extension will not have any external lights. It will have two windows, one an existing window facing west relocated in the new west wall of the extension to provide daylight into the vestry; the other facing north with a glass area of 250mm width x 600mm overall height, located above the flower sink.

It is not considered that the development will increase the amount of illumination outside the church.
