

Proposed extension to 11 Pine Walk, Liss Forest GU33 7AT.

Soils Management Plan.

Proposals.

Erection of a new single storey residential front/side extension within an existing garden curtilage.

Soil removal.

There are small areas of new foundation work to be carried out and this will result in the generation of some spoil which will be responsibly disposed of by the builder in an appropriate off site collection point. The quantities involved for these minor works will be minimal. Furthermore, the disturbed soil involved will not contain any toxic elements.

March 2024.
