## **Description of the Proposal**

Please note in regard to:

- Fire Statements From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. <u>View government planning guidance on fire statements</u> or access the fire statement template and guidance.

#### Description

Please describe details of the proposed development or works including any change of use

We intend to replace our 2,000L liquid oxygen storage tank with a larger 10,000 litre tank.

No building works are required for the installation of the new tank.

The new tank will be situated in the same location as the incumbent tank which is next to our building.

SOS uses liquid oxygen, which is stored in our 2,000 litre capacity tank, to turn into gaseous oxygen and pump into medical oxygen cylinders.

Because demand for medical oxygen has increased exponentially over the last 5 years we require a larger tank in order to keep up with demand.

Our medical oxygen cylinders are licenced medicines under MHRA authorisations and supplied to customers throughout the UK including emergency services.

The reason for requiring a new tank is to ensure our production and supply lines work seamlessly to negate shortages and ensure patient safety.
