### Description

Please describe details of the proposed development or works including any change of use

The proposed development is for installing children's wooden play equipment in a school field, 'The Chapel Woodland area'.

The school's main building is a grade II listed building and the play equipment would fall under curtilage.

The area identified is in Chapel Woods (the woods outside the school Chapel) in an existing clearing.

There will be no impact on the trees in the existing woodland, the area isn't in a conservation area but there are trees in the vicinity that have TPOs.

The current woodland is in moderate condition under the BNG matrix - the proposed development would increase this to good by adding 5 - 10 semi-mature tree species.

We also seek to add bat boxes to mature trees within the woodland, providing good additionality to the project and resulting in a biodiversity increase.

(as specified in the accompanying ecological and tree impact surveys)

The installation will not be visible from the house as it will be hidden by the trees

A design drawing of the proposal will be included in the documents submitted.

Has the work or change of use already started?

 No

## Existing Use
