## Description of Proposed Works

Please describe the proposed works

These works represent a remodelling of the existing garden shed and the creating of a new garden shed to replace the old.

Due to numerous burglaries over the past it was decided to replicate the same as number 54 with an outbuilding to replace the shed.

You will see from the photos the new shed is some 1.5m lower due to ground excavation and covers the area of the rear garden

Due to the requirement to retain the soil as existing the works required to be of a decent standard using concrete block and a full membrane to ensure the works would be deemed fit for purpose.

The photos will show the works the new reduced heights and the standard of the erection of the new shed which is solely for storage there is no heating or otherwise to enable any occupation whatsoever and this is not a requirement it is a well constructed shed completed with security and privacy in mind and nothing more.

The impact is less now of the previous shed both in height and light pollution to all residents and does not in our opinion have any negative impacts on any other persons or building demographic within.

Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended) sets out that every planning permission granted for the development of land in England shall be deemed to have been granted subject to the 'general biodiversity gain condition'.
