Dear Sirs,

**McDonald's Restaurant, Metropolitan House, Darkes Lane, Potters Bar, Hertfordshire, EN6 1AG**

Please find attached an application for the "Installation of a Gallows style Height Restrictor and finalised details for the acoustic canopy (Previously approved under 21/1364/FUL)."

The acoustic canopy was approved as part of an overarching application for "Relocation of condenser units to ground floor with acoustic canopy; consolidation of plant on first floor roof comprising an acoustic enclosure and provision of acoustic canopy over the customer order point for the McDonalds drive through restaurant". (Application Reference 21/1364/FUL) The design of the canopy has developed in line with the structural requirements with a minor diversion from the approved dimensions. The details of the canopy have been included for complete transparency.

The gallows height restrictor has been introduced to ensure that the size of vehicle entering the drive thru lane is restricted to ensure that the canopies are not damaged.

The digital signage shown on the drawings were previously approved under application reference 23/1398/ADV.

If you have any queries relating to this application, please do not hesitate to contact us.

Yours faithfully,

**Sarah Carpenter**
