

I'm sorry I am not able to give an accurate quote at this time due to the nature of the damage to your window ,as you know I specialise in the Repare of listed property's in Suffolk and have on many occasions brought what seemed like irretrievable windows and various wooden projects back from the dead but unfortunately there are limits and one of the major issues is that once the rot has been completely removed there needs to be ample solid timber for me to attach and Repare on to .On close inspection this window and it's sash's are beyond Repare ,because of this reason .

I recommend complete renewal as there has been far to much neglect over the years and it's took its toll .

I have attached some photos and hope you can get an idea of the problem .

Regards Mr C H Carsboul .

Comments

I may appear to look ok generally but it's only paint and filler keeping the illusion .
